Investment Objective

The investment objective of the Fund is to seek long-term growth of capital and income.

Investment Strategy

The Fund invests primarily in common and preferred stocks of United States and non-United States companies, including companies in emerging markets. Normally, the Fund invests the majority of its total assets in companies that pay dividends or otherwise seek to return capital to shareholders, such as by repurchasing their shares.

Fund Features

- Bottom-up stock selection based on fundamental research
- Focus on mid to large cap value stocks in the developed international markets
- Experienced personnel with a dedicated team focus
- Provides diversification benefits to a US portfolio

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost and current performance may be lower than the performance quoted. Returns greater than one year are average annual total returns. All information is as of the date shown. Investment performance reflects the Investment Manager's voluntary undertaking to limit ongoing charges during certain periods. In the absence of such voluntary undertaking, total return would be reduced. MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products. Returns greater than one year are annualized.

Market commentary

The fourth quarter's rising equity markets capped a calendar year of surging stock prices, as central banks, attempting to prolong economic expansion, implemented increasingly accommodative monetary policies. For the quarter, the top performing markets in our investable universe were Pakistan, Hungary, Ireland, Taiwan, and New Zealand. The worst performing markets were Chile, the United Arab Emirates, Belgium, Thailand, and Turkey. The best performing sectors in the MSCI ACWI Index ("Index") were information technology, health care, and materials. The worst performing sectors were utilities, consumer staples, and real estate. Every major currency except the Japanese yen appreciated versus the US dollar during the period, thus amplifying overall returns on overseas assets for US dollar-based investors.

Causeway Global Value UCITS Fund ("Fund") outperformed the Index during the quarter, due primarily to stock selection. Holdings in the banks, food beverage & tobacco, insurance, utilities, and automobiles & components industry groups contributed to performance compared to the Index. Fund holdings in the software & services and transportation industry groups, along with an overweight position in the telecommunication services industry group and an underweight position in the semiconductors & semi equipment and health care equipment & services industry groups, detracted from relative performance. The top contributor to return was banking & financial services company, UniCredit S.p.A. (Italy). Other notable contributors included energy exploration & production company, Halliburton Co. (United States), automobile manufacturer, Volkswagen AG (Germany), banking & financial services company, Barclays Plc (United Kingdom), and power & automation technology company, ABB Ltd. (Switzerland). The largest detractor was jet engine manufacturer, Rolls-Royce Holdings Plc (United Kingdom). Additional notable detractors included major passenger railway operator, East Japan Railway Co. (Japan), enterprise management software provider, Oracle Corp. (United States), property & casualty insurer, Sompo Holdings, Inc. (Japan), and onshore oilfield services company, RPC, Inc. (United States).

Causeway Capital Management LLC is not registered as an investment adviser outside of the United States. Note that Causeway Funds plc and the Fund may not be authorised for distribution by the relevant central bank or similar securities or financial services regulatory authority in certain jurisdictions. Nothing in these materials constitutes any offer to sell or the solicitation of any offer to buy securities in or from any territory where the same would require compliance with any regulatory filing or like requirement or where the same would constitute an offence. No subscription for shares of the Fund may be accepted without completion of a final Fund Application, which may only be obtained upon further request and which may include additional representations and information relevant for a particular jurisdiction.

Investing involves risk, including possible loss of principal. International investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. The Fund is also subject to, among other risks, market fluctuations and security selection risk, and value stock risk. Current and future securities exposures are subject to risk.

The MSCI ACWI Index (Gross) is a free float-adjusted market capitalization index, designed to measure the equity market performance of developed and emerging markets, consisting of 23 developed country indices, including the U.S., and 26 emerging market country indices. The Index is gross of withholding taxes, assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. The Fund's value discipline may prevent or restrict investment in major stocks in the benchmark index. It is not possible to invest directly in an index. Holdings are subject to change. There is no assurance that any securities exposures mentioned will remain in or out of the Fund.
