The performance data quoted herein represents past performance. Past performance is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost, and current performance may be lower than the performance quoted. For performance data current to the most recent month end, please call 1.866.947.7000.

Returns greater than one year are annualized. Total returns assume reinvestment of dividends and capital gains distributions at net asset value when paid. Investment performance reflects contractual fee waivers. In the absence of such fee waivers, total return would be reduced.

Market commentary

Global equities rallied in the fourth quarter, capping off the third consecutive calendar year of strong positive returns. The top performing markets in our investable universe were Egypt, Switzerland, the Czech Republic, Peru, and the United Arab Emirates. The worst performing markets were Turkey, Hungary, Chile, Russia, and Argentina. The best performing sectors in the MSCI ACWI Index ("Index") were information technology, utilities, and real estate. The worst performing sectors were communication services, energy, and financials.

The Causeway Concentrated Equity Fund ("Fund") underperformed the Index during the quarter, due primarily to stock selection. Fund holdings in the software & services, technology hardware & equipment, and pharmaceuticals & biotechnology industry groups, along with an underweight position in the semiconductors & semi equipment and automobiles & components industry groups, detracted from relative performance. Holdings in the media & entertainment, utilities, and health care equipment & services industry groups, as well as an underweight position in the retailing and telecommunication services industry groups, offset some of the underperformance compared to the Index. The largest detractor was travel & tourism technology company, Sabre Corp. (United States). Additional notable detractors included Takeda Pharmaceutical Co., Ltd. (Japan), paper & packaging solutions company, WestRock Co. (United States), retail bank, CaixaBank SA (Spain), and financial services technology company, Fiserv, Inc. (United States). The top contributor to return was specialty chemicals manufacturer, Ashland Global Holdings, Inc. (United States). Other notable contributors included pharmaceuticals & biotechnology company, Roche Holding AG (Switzerland), plastic packaging manufacturer, Berry Global Group (United States), business process outsourcing services provider, Genpact Ltd. (United States), and utilities provider, Exelon Corp. (United States).

To determine if the Causeway Concentrated Equity Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expenses before investing. Risk Disclosures: Mutual fund investing involves risk, including possible loss of principal. Value stocks are subject to the risks that their intrinsic value may never be realized by the market and that their prices may go down. In addition to the normal risks associated with equity investing, international investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors, as well as increased volatility and lower trading volume. Investments in smaller and medium-sized companies involve additional risks and typically exhibit higher volatility. The Fund's concentration in a limited number of stocks will increase the impact of, and potential losses associated with, the risks from investing in those stocks.
