Investment objective

The Fund's investment objective is to seek long-term growth of capital.

The Fund invests primarily in companies both in developed markets - excluding the United States ("international value portfolio") - and in emerging markets ("emerging markets portfolio"). The Investment Adviser allocates substantially all of the Fund's assets between the international value portfolio and the emerging markets portfolio using a proprietary asset allocation model.

Fund features

- The international value portfolio uses bottom-up stock selection based on fundamental research, focusing on mid to large cap value stocks in developed international markets.
- The emerging markets portfolio uses an actively managed tracking-error oriented quantitative strategy, combining bottom-up and top-down factors in security selection.

The performance data quoted herein represents past performance. Past performance is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost, and current performance may be lower than the performance quoted. For performance data current to the most recent month end, please call 1.866.947.7000.

Returns greater than one year are annualized. Total returns assume reinvestment of dividends and capital gains distributions at net asset value when paid. Investment performance reflects contractual fee waivers. In the absence of such fee waivers, total return would be reduced. High relative or absolute performance may not be repeatable.

Market commentary

Equities continued to deliver strong returns during most of the second quarter as vaccination campaigns accelerated in most regions, facilitating easing of Covid-19-related economic restrictions. Emerging markets also posted positive returns. Despite the progress, the Delta variant of the virus and differing vaccination rates across geographies have resulted in an uneven recovery. The top performing markets in our investable universe were Brazil, Poland, Hungary, the Czech Republic, and Russia. The worst performing markets were Chile, Egypt, Peru, Pakistan, and New Zealand. The best performing sectors in the MSCI ACWI ex US Index ("Index") were health care, energy, and consumer staples. The worst performing sectors were utilities, communication services, and real estate.

The Causeway International Opportunities Fund ("Fund") underperformed the Index during the quarter, due primarily to stock selection. Fund holdings in the technology hardware & equipment, transportation, utilities, pharmaceuticals & biotechnology, and semiconductors & semi equipment industry groups detracted from relative performance. Holdings in the materials, banks, and food & staples retailing industry groups, as well as an underweight position in the telecommunication services and consumer services industry groups, offset some of the underperformance compared to the Index. The largest detractor was Takeda Pharmaceutical Co., Ltd. (Japan). Additional notable detractors included electric, gas and renewables power generation and distribution company, Enel SpA (Italy), jet engine manufacturer, Rolls-Royce Holdings Plc (United Kingdom), life insurer, Prudential Plc (United Kingdom), and e-commerce retailer, Vipshop Holdings - ADR (China). The top contributor to return was banking & financial services company, UniCredit S.p.A. (Italy). Other notable contributors included business software & services provider, SAP SE (Germany), pharmaceuticals & biotechnology company, Roche Holding AG (Switzerland), luxury goods manufacturer & retailer, Compagnie Financiere Richemont (Switzerland), and bank, Banco Bilbao Vizcaya Argentaria SA (Spain).

Risk Disclosures: Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with equity investing, international investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors, as well as increased volatility and lower trading volume. Current and future holdings are subject to risk. Diversification does not protect against market loss. There is no guarantee that securities mentioned will remain in or out of the Fund.

The market commentary expresses the portfolio managers' views as of the date of this report and should not be relied on as research or investment advice regarding any stock. These views and any portfolio holdings and characteristics are subject to change. There is no guarantee that any forecasts made will come to pass. Any securities identified and described do not represent all of the securities purchased, sold, or recommended for the Fund. The reader should not assume that an investment in any securities identified was or will be profitable.

The MSCI ACWI ex USA (Gross) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the U.S. The Index is gross of withholding taxes, assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. Indices are unmanaged and one cannot invest directly in an index.

MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products.
