## Investment objective

The Fund's investment objective is to seek long-term growth of capital.

The Fund invests primarily in companies both in developed markets - excluding the United States ("international value portfolio") - and in emerging markets ("emerging markets portfolio"). The Investment Adviser allocates substantially all of the Fund's assets between the international value portfolio and the emerging markets portfolio using a proprietary asset allocation model.

## Fund features

- The international value portfolio uses bottom-up stock selection based on fundamental research, focusing on mid to large cap value stocks in developed international markets.
- The emerging markets portfolio uses an actively managed tracking-error oriented quantitative strategy, combining bottom-up and top-down factors in security selection.

The performance data quoted herein represents past performance. Past performance is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost, and current performance may be lower than the performance quoted. For performance data current to the most recent month end, please call 1.866.947.7000.

Returns greater than one year are annualized. Total returns assume reinvestment of dividends and capital gains distributions at net asset value when paid. Investment performance reflects contractual fee waivers. In the absence of such fee waivers, total return would be reduced.

## Market commentary

Equity markets appreciated during the quarter, as monetary and fiscal stimulus supported a further resumption in business activity from the coronavirus lockdowns. The top performing markets in our investable universe were Taiwan, Denmark, India, Ireland, and Sweden. The worst performing markets were Turkey, Thailand, Hungary, Indonesia, and the Czech Republic. The best performing sectors in the MSCI ACWI ex US Index ("Index") were consumer discretionary, information technology, and materials. The worst performing sectors were energy, financials, and utilities. Currency proved favorable as major currencies advanced against the US dollar.

Causeway International Opportunities Fund ("Fund") underperformed the Index during the quarter, due primarily to stock selection. Fund holdings in the capital goods, pharmaceuticals & biotechnology, and insurance industry groups, along with an overweight position in the banks industry group and an underweight position in the retailing industry group, detracted from performance relative to the Index. Holdings in the materials industry group, as well as an overweight position in the semiconductors & semi equipment and transportation industry groups and an underweight position in the real estate and utilities industry groups, offset some of the underperformance versus the Index. The largest detractor was jet engine manufacturer, Rolls-Royce Holdings Plc (United Kingdom). Additional notable detractors included banking & financial services company, UniCredit S.p.A. (Italy), crude oil & natural gas company, BP Plc (United Kingdom), bank, Banco Bilbao Vizcaya Argentaria SA (Spain), and banking & financial services company, Barclays Plc (United Kingdom). The top contributor to return was internet commerce company, Alibaba Group Holding (China). Other notable contributors included integrated circuit manufacturer, Taiwan Semiconductor Manufacturing Co., Ltd. (Taiwan), mail, express & logistics services provider, Deutsche Post AG (Germany), industrial conglomerate, Siemens AG (Germany), and semiconductor company, Infineon Technologies AG (Germany).

**Risk Disclosures:** Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with equity investing, international investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors, as well as increased volatility and lower trading volume. Current and future holdings are subject to risk. Diversification does not protect against market loss. There is no guarantee that securities mentioned will remain in or out of the Fund.

The market commentary expresses the portfolio managers' views as of the date of this report and should not be relied on as research or investment advice regarding any stock. These views and any portfolio holdings and characteristics are subject to change. There is no guarantee that any forecasts made will come to pass. Any securities identified and described do not represent all of the securities purchased, sold, or recommended for the Fund. The reader should not assume that an investment in any securities identified was or will be profitable.

The MSCI ACWI ex USA (Gross) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the U.S. The Index is gross of withholding taxes, assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. Indices are unmanaged and one cannot invest directly in an index.
