Terminated accounts are included in the International Small Cap Composite through the last full month under management. A complete list and description of Firm composites is available upon request.

Account returns are calculated daily. Monthly account returns are calculated by geometrically linking the daily returns. The return of the International Composite is calculated monthly by weighting monthly account returns by the beginning market values. Valuations and returns are computed and stated in U.S. dollars. Returns include the reinvestment of interest, dividends and any capital gains. Returns are calculated gross of withholding taxes on dividends, interest income, and capital gains. The Firm’s policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Past performance is no guarantee of future performance. Composite dispersion, if applicable, is calculated using the equal-weighted standard deviation of all portfolios that were included in the International Composite for the entire year. The three-year annualized ex-post standard deviation quantifies the variability of the composite or benchmark returns over the preceding 36-month period.

The benchmark of the International Small Cap Composite is the MSCI ACWI ex USA Small Cap Index, which is a free float-adjusted market capitalization weighted index, designed to measure the equity market performance of smaller capitalization stocks in developed and emerging markets excluding the U.S. market. The Index covers approximately 14% of the free float-adjusted market capitalization in each country. The Index is gross of withholding taxes, assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. Accounts in the International Small Cap Composite may invest in countries not included in the MSCI ACWI ex USA Small Cap Index, and may use different benchmarks.

Gross-of-fees returns are presented before management, performance and custody fees but after trading expenses.
