Investment objective

The Fund's investment objective is to seek long-term growth of capital.

The Fund invests primarily in companies both in developed markets - excluding the United States ("international value portfolio") - and in emerging markets ("emerging markets portfolio"). The Investment Adviser allocates substantially all of the Fund's assets between the international value portfolio and the emerging markets portfolio using a proprietary asset allocation model.

Fund features

- The international value portfolio uses bottom-up stock selection based on fundamental research, focusing on mid to large cap value stocks in developed international markets.
- The emerging markets portfolio uses an actively managed tracking-error oriented quantitative strategy, combining bottom-up and top-down factors in security selection.

The performance data quoted herein represents past performance. Past performance is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost, and current performance may be lower than the performance quoted. For performance data current to the most recent month end, please call 1.866.947.7000.

Returns greater than one year are annualized. Total returns assume reinvestment of dividends and capital gains distributions at net asset value when paid. Investment performance reflects contractual fee waivers. In the absence of such fee waivers, total return would be reduced. High relative or absolute performance may not be repeatable.

Market commentary

Global equity markets withstood shocks to the financial sector to advance over the quarter. Value indices ceded recent performance leadership to growth indices—especially in the US—as equity investors sold financials stocks and rotated into the technology sector. During the quarter, the top-performing country markets in our investable universe were Czech Republic, Egypt, and Ireland in local currency terms. The weakest-performing markets were Colombia, United Arab Emirates, and Brazil. The top-performing sectors in the MSCI ACWI ex US Index (“Index”) were information technology, communication services, and consumer discretionary. The worst-performing sectors were real estate, energy, and financials.

The Causeway International Opportunities Fund (“Fund”), on a net asset value basis, outperformed the Index during the quarter. On a gross return basis, Fund holdings in the capital goods, banks, and software & services industry groups contributed to relative performance. Holdings in the consumer durables & apparel, semiconductors & semi equipment, and media & entertainment industry groups detracted from relative performance. The top individual contributors to absolute return included jet engine manufacturer, Rolls-Royce Holdings Plc (United Kingdom), banking & financial services company, UniCredit S.p.A. (Italy), and travel & tourism information technology provider, Amadeus IT Group SA (Spain). The largest individual detractors from performance included pharmaceuticals & biotechnology company, Roche Holding AG (Switzerland), e-commerce company, JD.com, Inc. (China), and e-commerce platform for local products & services, Meituan (China).

Equity allocation model update

We use a proprietary quantitative equity allocation model that assists the portfolio managers in determining the weight of emerging versus developed markets in the Fund. Our allocation relative to the weight of emerging markets in the Index is currently underweight. We identify five primary factors as most indicative of the ideal allocation target: valuation, quality, earnings growth, macroeconomic, and risk aversion. Valuation is currently positive for emerging markets in our model. Our quality metrics, which include such measures as profit margins and return on equity, are negative. Our earnings growth and macroeconomic factors are negative for emerging markets. Lastly, our risk aversion factor is neutral in our model.

To determine if the Causeway International Opportunities Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expenses before investing. Please read the summary or full prospectus carefully before you invest or send money. Risk Disclosures: Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with equity investing, international investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors, as well as increased volatility and lower trading volume. Current and future holdings are subject to risk. Diversification does not protect against market loss. There is no guarantee that securities mentioned will remain in or out of the Fund.

The market commentary expresses the portfolio managers' views as of the date of this report and should not be relied on as research or investment advice regarding any stock. These views and the fund holdings and characteristics are subject to change. There is no guarantee that any forecasts made will come to pass. Any securities identified and described in this report do not represent all of the securities purchased, sold or recommended for client accounts. The reader should not assume that an investment in the securities identified was or will be profitable. Diversification does not protect against market loss.

The MSCI ACWI ex USA Index (Gross) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the U.S. The Index is gross of withholding taxes, assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. Indices are unmanaged and one cannot invest directly in an index.

MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products.
