### Causeway Global Value Equity Composite Review for Month Ended March 31, 2025

#### Commentary Highlights

- Global equity markets began the year on an optimistic note, but US stocks faltered amid tax policy uncertainty and shifting tariff pronouncements.
- Global trade tensions are escalating, with the trade war introducing significant economic and geopolitical uncertainty.
- Causeway's global and international value portfolios focus on identifying undervalued stocks rather than positioning around macroeconomic trends.

#### Performance Review

Global equity markets began the year on an optimistic note, but US stocks faltered amid tax policy uncertainty and shifting tariff pronouncements. Non-US equities outperformed for the month, led by gains in European financials and industrials. The top performing markets in our investable universe were the Czech Republic, Norway, and Greece. The worst performing markets were Denmark, Taiwan, and Turkey. The best performing sectors in the MSCI ACWI Index ("Index") were energy, utilities, and materials. The worst performing sectors were information technology, consumer discretionary, and communication services.

The Portfolio underperformed the Index during the month, due primarily to stock selection. Portfolio holdings in the consumer durables & apparel, banks, and consumer services industry groups detracted from relative performance. Holdings in the insurance, technology hardware & equipment, and capital goods industry groups offset some of the underperformance compared to the Index. The largest detractor was multinational luxury conglomerate, Kering SA (France). Additional notable detractors included semiconductor company, Renesas Electronics Corp. (Japan), and media & entertainment conglomerate, The Walt Disney Co. (United States). The top contributor to return was Asian life insurer, Prudential Plc (United Kingdom). Other notable contributors included medical device producer, Zimmer Biomet Holdings, Inc. (United States), and electronic equipment manufacturer, Samsung Electronics Co., Ltd. (South Korea).

#### Quarterly Investment Outlook

Global trade tensions are escalating, with the trade war introducing significant economic and geopolitical uncertainty. During the quarter, the US placed the most punitive tariffs on China. Meanwhile China is prioritizing economic stability, technological advancement, and domestic consumption to meet its ambitious growth targets. EU fiscal integration is accelerating, with growing urgency to deepen capital markets. Recognizing the need for greater self-reliance, European leaders have committed to military and economic revitalization. Germany, just weeks after its February election, approved substantial defense and infrastructure spending. Additionally, Chinese investment in Europe is likely to continue climbing as China diversifies its trade relationships. In contrast, the UK faces stagflation, with the Bank of England cautiously navigating persistent inflation and gilt market volatility amid slowing growth.

De-globalization and tariffs appear likely to dampen real growth, increase inflationary pressures, and create sector-level dislocations. However, these disruptions can generate mispricing and opportunities for active investors. Despite the likelihood of a more difficult economic environment ahead, we remain optimistic that we can exploit share price weakness in desirable stocks. This period of market dislocation provides an opportunity to add to positions in companies we believe will overcome tariffs and produce attractive multi-year returns. Companies with few competitors and strong pricing power have become especially valuable in this environment.

Causeway's global and international value portfolios focus on identifying undervalued stocks rather than positioning around macroeconomic trends. Despite recent gains, non-US developed markets continue to trade at a significant discount to the US, where indices remain driven by a handful of AI-focused companies. The era of ultra-low interest rates is over, making near-term cash flows more attractive than speculative growth. Certain cyclical stocks now offer some of the lowest valuations since 2020 and are rising in our risk-adjusted return rankings. We are also focusing on companies providing mission-critical services to enterprises, which should see robust order growth regardless of tariff changes. As companies invest in digitalization and cloud transitions, IT Services firms are poised for renewed interest. Across sectors, Causeway targets companies improving efficiency, driving earnings, and boosting cash flow growth.

Causeway Capital Management LLC (Causeway) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Causeway has been independently verified for the periods June 11, 2001 through December 31, 2023.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all

the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Global Value Equity Composite (Global Composite) has had a performance examination for the periods September 30, 2001 through December 31, 2023. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The Firm, Causeway, is organized as a Delaware limited liability company and began operations in June 2001. It is registered as an investment adviser with the U.S. Securities and Exchange Commission under the Investment Advisers Act of 1940. Registration does not imply a certain level of skill or training. Causeway manages international, global, and emerging markets equity assets primarily for institutional clients including corporations, pension plans, sovereign wealth funds, superannuation funds, public retirement plans, Taft-Hartley pension plans, endowments and foundations, mutual funds and other collective investment vehicles, charities, private trusts and funds, model and SMA programs, and other institutions. The Firm includes all discretionary and non-discretionary accounts managed by Causeway.

The Global Composite includes all U.S. dollar denominated, discretionary accounts in the global value equity strategy which are not constrained by socially responsible investment restrictions. Through March 30, 2007, Causeway managed the Global Composite using research and recommendations regarding U.S. value stocks from an unaffiliated investment advisory firm under a research services agreement for an asset-based fee. The global value equity strategy seeks long-term growth of capital and income through investment primarily in equity securities of companies in developed countries located outside the U.S. and of companies located in the U.S. New accounts are included in the Global Composite after the first full month under management. Terminated accounts are included in the Global Composite through the last full month under management. A complete list and description of firm composites, a list of limited distribution pooled fund descriptions, and a list of broad distribution pooled funds are available upon request.

Account returns are calculated daily. Monthly account returns are calculated by geometrically linking the daily returns. The return of the Global Composite is calculated monthly by weighting monthly account returns by the beginning market values. Valuations and returns are computed and stated in U.S. dollars. Returns include the reinvestment of interest, dividends and any capital gains. Returns are calculated gross of withholding taxes on dividends, interest income, and capital gains, except returns of Causeway Global Value Fund are net of such withholding taxes and reflect accrued tax treaty reclaims. The firm's policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Past performance is no guarantee of future performance. Composite dispersion, if applicable, is calculated using the equal-weighted standard deviation of all portfolios that were included in the Global Composite for the entire year. The three-year annualized ex-post standard deviation quantifies the variability of the composite or benchmark returns over the preceding 36-month period.

Prior to October 1, 2018, the Global Composite's benchmark is the MSCI World Index. Beginning October 1, 2018, the Global Composite's benchmark is the MSCI ACWI Index. The benchmark changed because Causeway believes that the MSCI ACWI Index, which includes emerging as well as developed markets, better represents the types of securities in which the Global Composite invests. The MSCI ACWI Index is a free float-adjusted market capitalization index, designed to measure the equity market performance of developed and emerging markets, consisting of 23 developed country indices, including the U.S., and 24 emerging market country indices. The MSCI World Index is a free float-adjusted market capitalization weighted index, designed to measure developed market equity performance, consisting of 23 developed country indices, including the U.S. The indices are gross of withholding taxes, assume reinvestment of dividends and capital gains, and assume no management, custody, transaction or other expenses. Accounts in the Global Composite may invest in countries not included in the MSCI ACWI Index or the MSCI World Index, and may use different benchmarks.

Gross-of-fees returns are presented before management and custody fees but after trading expenses. Net-of-fees returns are presented after the deduction of actual management fees, performance-based fees, and all trading expenses, but before custody fees. Causeway's management fee schedules are described in its firm brochure pursuant to Part 2 of Form ADV. The basic separate account annual fee schedule for global value equity assets under management is: 0.60% of the first \$200 million and 0.45% thereafter. The highest expense ratio and the highest all-in fee for a collective investment trust (CIT), which is included in the Global Composite, is 0.95%. The fee schedule for the CIT is an all-in fee, and represents fees paid to the trustee of the CIT, which covers normal operating fees and expenses of the CIT, and compensation to the trustee and to Causeway as the investment manager. Accounts in the Global Composite may have different fee schedules.

MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations, and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products.

### Additional Important Disclosures

Data, except total strategy assets and composite performance, is based on a representative account in the Global Value Equity strategy.

FY2 P/E is the weighted harmonic average 2-year analysts' consensus forecast price-to-earnings ratio. Price-to-book value ratio is weighted harmonic average and dividend yield is a weighted average. Return on Equity is calculated as a weighted average, winsorized using maximum Return on Equity figures at 3 standard deviations from the mean (winsorization is a statistical technique intended to remove the impact of outliers).

Attribution charts show where the Portfolio's investments performed better or worse than the benchmark index during the period. Attribution is based on the return of the Portfolio's holdings gross of management fees.

Industry group allocation is based on the equity portion of the portfolio (i.e., excluding cash). The MSCI ACWI Index is a free float-adjusted market capitalization index, designed to measure the equity market performance of developed and emerging markets, consisting of developed country indices, including the U.S., and emerging market country indices. The MSCI ACWI Value Index is a subset of this index, and targets 50% coverage, with value investment style characteristics for index construction using three variables: book value to price, 12-month forward earnings to price, and dividend yield. Index returns are presented gross or net of tax withholdings on income and dividends. It is not possible to invest directly in an index.

Holdings are subject to change.

The securities identified and described above do not represent all of the securities purchased, sold or recommended for client accounts. The reader should not assume that an investment in the securities identified was or will be profitable. Past performance does not guarantee future results. For a description of our performance attribution methodology, or to obtain a list showing every holding's contribution to the overall account's performance during the month, please contact Kevin Moutes at 310-231-6116 or [Moutes@causewaycap.com](mailto:Moutes@causewaycap.com).
