Causeway International Value Select Composite Review for Month Ended January 31, 2024

Commentary Highlights

- In January, a surge in US and European technology stocks boosted developed equity markets, while a sell-off in Chinese technology drove emerging equity markets into negative territory.
- The valuation discounts of non-US developed equity markets versus the US are, in our view, only partially attributable to sector differences and greater capital efficiency (higher returns on invested capital).
- We continue to focus on the long-term rewards from operational restructuring. In our experience, capable and motivated management teams of underearning companies can—and often do—boost returns to shareholders.

Performance Review

In January, a surge in US and European technology stocks boosted developed equity markets, while a sell-off in Chinese technology drove emerging equity markets into negative territory. The top performing markets in our investable universe were the Netherlands, Ireland, and Denmark. The worst performing markets were China, South Korea, and Hong Kong. The best performing sectors in the MSCI EAFE Index (“Index”) were information technology, consumer discretionary, and communication services. The worst performing sectors were materials, utilities, and real estate. Currency proved a headwind as major currencies declined against the US dollar.

The Portfolio underperformed the Index during the month, due primarily to stock selection. Portfolio holdings in the technology hardware & equipment and semiconductors & semi equipment industry groups, along with an underweight position in the automobiles & components industry group, detracted from relative performance. Holdings in the household & personal products and software & services industry groups, as well as an underweight position in the materials industry group, offset some of the underperformance compared to the Index. The largest detractor was electronic equipment manufacturer, Samsung Electronics Co., Ltd. (South Korea). Additional notable detractors included electric utility provider, RWE AG (Germany), and Asian life insurer, Prudential Plc (United Kingdom). The top contributor to return was business software & services provider, SAP SE (Germany). Other notable contributors included banking & financial services company, UniCredit S.p.A. (Italy), and pharmaceutical & consumer healthcare company, GSK Plc (United Kingdom).

Quarterly Investment Outlook

The valuation discounts of non-US developed equity markets versus the US are, in our view, only partially attributable to sector differences and greater capital efficiency (higher returns on invested capital). We are skeptical that the upward valuation re-rating the US market experienced in 2023 can persist in 2024, largely due to shrinking global monetary liquidity. US money supply, as measured by M2*, continues to decrease as savings decline and major central banks reduce their balance sheets via quantitative tightening.

A slow interest rate cutting cycle leaves plenty of room for successful stock selection, as economic uncertainty generally creates price volatility, especially in cyclical sectors. Given the fear of re-igniting inflation, we believe major central banks must keep real interest rates positive in this cycle and aim for an equilibrium rate to maximize economic growth at a stable approximately 2% inflation rate. Positive real interest rates typically bode well for the value investment style, especially when coupled with intensive fundamental research.

We continue to focus on the long-term rewards from operational restructuring. In our experience, capable and motivated management teams of underearning companies can—and often do—boost returns to shareholders. Importantly, we aim to

International Value Select

identify and buy these stocks many months before markets perceive positive catalysts. Many of the global and international portfolio holdings we expect to outperform in 2024 add, in our view, operational restructuring upside potential to the portfolio across a range of sectors, such as consumer discretionary, industrials, consumer staples and information technology.

*M2 is a measure of the U.S. money stock that includes M1 (currency and coins held by the non-bank public, checkable deposits, and travelers' checks) plus savings deposits (including money market deposit accounts), small time deposits under \$100,000, and shares in retail money market mutual funds.

The market commentary expresses the portfolio managers' views as of the date of this report and should not be relied on as research or investment advice regarding any stock. These views and any portfolio holdings and characteristics are subject to change. There is no guarantee that any forecasts made will come to pass. Forecasts are subject to numerous assumptions, risks and uncertainties, which change over time, and Causeway undertakes no duty to update any such forecasts. Information and data presented has been developed internally and/or obtained from sources believed to be reliable; however, Causeway does not guarantee the accuracy, adequacy or completeness of such information. Index returns, if any, are gross of withholding taxes, assume reinvestment of dividends and capital gains, and assume no management, custody, transaction or other expenses.

Causeway Capital Management LLC (Causeway) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Causeway has been independently verified for the periods June 11, 2001 through December 31, 2021.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The International Value Select Composite (Select

Composite) has had a performance examination for the periods March 31, 2005 through December 31, 2021. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The Firm, Causeway, is organized as a Delaware limited liability company and began operations in June 2001. It is registered as an investment adviser with the U.S. Securities and Exchange Commission under the Investment Advisers Act of 1940. Registration does not imply a certain level of skill or training. Causeway manages international, global, and emerging markets equity assets for institutional clients including corporations, pension plans, sovereign wealth funds, superannuation funds, public retirement plans, Taft-Hartley pension plans, endowments and foundations, mutual funds and other collective investment vehicles, charities, private trusts and funds, wrap fee programs, and other institutions. The Firm includes all discretionary and non-discretionary accounts managed by Causeway.

The Select Composite includes all U.S. dollar denominated, discretionary accounts in the international value equity strategy which apply a minimum market capitalization requirement of \$2.5 billion or higher at the time of initial investment. The international value select strategy seeks long-term growth of capital and income through investment primarily in larger capitalization equity securities of companies in developed countries located outside the U.S. New accounts are included in the Select Composite after the first full month under management. Terminated accounts are included in the Select Composite through the last full month under management. A complete list and description of Firm composites is available upon request.

Account returns are calculated daily. Monthly account returns are calculated by geometrically linking the daily returns. The return of the Select Composite is calculated monthly by weighting monthly account returns by the beginning market values. Valuations and returns are computed and stated in U.S. dollars. Returns include the reinvestment of interest, dividends and any capital gains. Returns are calculated gross of withholding taxes on dividends, interest income, and capital gains. The Firm's policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Past performance is no guarantee of future performance. Composite dispersion, if applicable, is calculated using the equal-weighted standard deviation of all portfolios that were included in the Select Composite for the entire year. The three-year annualized ex-post standard deviation quantifies the variability of the composite or benchmark returns over the preceding 36-month period.

The Select Composite's benchmark is the MSCI EAFE Index, which is a free float-adjusted market capitalization weighted index, designed to measure developed market equity performance excluding the U.S. and Canada, consisting of 21 stock markets in Europe, Australasia, and the Far East. The Index is gross of withholding taxes, assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. Accounts in the Select Composite may invest in countries not included in the MSCI EAFE Index, and may use different benchmarks.

Gross-of-fees returns are presented before management and custody fees but after trading expenses. Net-of-fees returns are presented after the deduction of actual management fees, performance-based fees, and all trading expenses, but before custody fees. Causeway's basic management fee schedules are described in its Firm brochure pursuant to Part 2 of Form ADV. The basic separate account annual fee schedule for international value select assets under management is: 0.60% of the first \$200 million and 0.45% thereafter. Accounts in the Select Composite may have different fee schedules.

MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations, and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products.

Additional Disclosures

Data, except total strategy assets and composite performance, is based on a representative account in the International Value Select strategy.

Source: Factset. Wtd Avg Mkt Cap is a weighted average of the total market capitalization of stocks in the portfolio or index. FY2 P/E is the weighted harmonic average 2-year analysts' consensus forecast price-to-earnings ratio. Price to earnings is a ratio for valuing a company that measures its current share price relative to its per share earnings. Price-to-book (P/B) value evaluates a firm's market value relative to its book value and is a weighted harmonic average. Return on Equity measures how efficiently a company is generating income from the equity investments of its shareholders. Return on Equity is calculated as a weighted average, winsorized using maximum Return on Equity figures at 3 standard deviations from the mean (winsorization is a statistical technique intended to remove the impact of outliers). Dividend Yield is an average percentage of return determined by dividing the amount of the annual dividends per share by the current net asset value.

Industry group allocation is based on the equity portion of the portfolio (i.e., excluding cash). Attribution charts show where the Portfolio's investments performed better or worse than the benchmark index during the period. Attribution is based on the return of the Portfolio's holdings gross of management fees.

The MSCI EAFE Value Index is a subset of this index, and targets 50% coverage, with value investment style characteristics for index construction using three variables: book value to price, 12-month forward earnings to price, and dividend yield. The indices are gross of withholding taxes, assume reinvestment of dividends and capital gains, and assume no management, custody, transaction or other expenses. It is not possible to invest directly in an index.

Holdings are subject to change.

The securities identified and described above do not represent all of the securities purchased, sold or recommended for client accounts. The reader should not assume that an investment in the securities identified was or will be profitable. Past performance does not guarantee future results.
