The performance data quoted herein represents past performance. Past performance is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost, and current performance may be lower than the performance quoted. For performance data current to the most recent month end, please call 1.866.947.7000.

Returns greater than one year are annualized. Total returns assume reinvestment of dividends and capital gains distributions at net asset value when paid. Investment performance reflects contractual fee waivers. In the absence of such fee waivers, total return would be reduced. Investor Class shares charge up to a 0.25% annual shareholder service fee.

Effective October 1, 2018, the Global Value Fund's benchmark changed from the MSCI World Index (Gross) to the MSCI ACWI Index (Gross). Causeway believes that the MSCI ACWI Index (Gross), which includes emerging as well as developed markets, better represents the types of securities in which the strategy invests. The MSCI ACWI Index (Gross) is a free float-adjusted market capitalization index, designed to measure the equity market performance of developed and emerging markets, consisting of 23 developed country indices, including the U.S., and 24 emerging market country indices. Prior to October 1, 2018, the benchmark index for the Global Value Fund was the MSCI World Index (Gross). This Index is a free float adjusted market capitalization weighted index, designed to measure developed market equity performance, consisting of 23 developed country indices, including the U.S. The Indices are gross of withholding taxes, assume reinvestment of dividends and capital gains, and assume no management, custody, transaction or other expenses. It is not possible to invest directly in an index.

Market commentary

Developed equity markets appreciated in the third quarter following signs of continuing global growth, albeit less synchronized than in 2017 as the US has outpaced other developed markets. The top performing markets in our investable universe included Thailand, Qatar, Poland, the United States, and Switzerland. The worst performing markets included Turkey, Greece, China, South Africa, and Egypt. The best performing sectors in the MSCI ACWI Index* ("Index") were health care, information technology, and industrials. The worst performing sectors were real estate, materials, and utilities.

The Causeway Global Value Fund ("Fund") outperformed the Index during the quarter, due primarily to stock selection. Fund holdings in the software & services, retailing, capital goods, and semiconductors & semi equipment industry groups, as well as an overweight position in the pharmaceuticals & biotechnology industry group, contributed to relative outperformance. Holdings in the banks, utilities, food beverage & tobacco, and insurance industry groups, along with an underweight position in the technology hardware & equipment industry group, offset some of the outperformance. The top contributor to return was refining equipment manufacturer, Flowserve Corp. (United States). Other notable contributors included automobile components retailer, Advance Auto Parts, Inc. (United States), pharmaceutical giant, Eli Lilly & Co. (United States), digital wireless communications equipment manufacturer, QUALCOMM, Inc. (United States), and wireless communications operator, SK Telecom Co., Ltd. (South Korea). The largest detractor was energy exploration & production company, Halliburton Co. (United States). Additional notable detractors included banking & financial services company, Barclays Plc (United Kingdom), British American Tobacco plc (United Kingdom), utilities provider, SSE Plc (United Kingdom), and banking & financial services company, UniCredit S.p.A. (Italy).

Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with equity investing, international investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors, as well as increased volatility and lower trading volume. Current and future holdings are subject to risk. Diversification does not protect against market loss. There is no guarantee that securities mentioned will remain in or out of the Fund.

The Morningstar Analyst Rating™ is not a credit or risk rating. It is a subjective evaluation performed by Morningstar's manager research group, which consists of various Morningstar, Inc. subsidiaries ("Manager Research Group"). In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission. The Manager Research Group evaluates funds based on five key pillars, which are process, performance, people, parent, and price. The Manager Research Group uses this five pillar evaluation to determine how they believe funds are likely to perform relative to a benchmark, or in the case of exchange-traded funds and index mutual funds, a relevant peer group, over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weight of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, and Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflects the Manager Research Group's conviction in a fund's prospects for outperformance. Analyst Ratings ultimately reflect the Manager Research Group's overall assessment, are overseen by an Analyst Rating Committee, and are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to global.morningstar.com/managerdisclosures/.

The Morningstar Analyst Rating (i) should not be used as the sole basis in evaluating a fund, (ii) involves unknown risks and uncertainties which may cause Analyst expectations not to occur or to differ significantly from what they expected, and (iii) should not be considered an offer or solicitation to buy or sell the fund.
