Performance greater than one year is annualized. **The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost and current performance may be lower than the performance quoted. For performance as of the most recent month-end, please call 1-866-947-7000.** Investment performance reflects fee waivers. In the absence of such fee waivers, total return would be reduced. Total annual fund operating expenses for the Institutional Class are 0.90% (gross) and are 0.88% (net) after the investment adviser fee waiver. Total annual fund operating expenses for the Investor Class are 1.15% (gross) and are 1.13% (net) after investment adviser fee waiver. The waivers are contractual and in effect until 1/31/2025. Investor Class shares charge up to a 0.25% annual shareholder service fee. Total returns assume reinvestment of dividends and capital gains distributions at net asset value when paid.

Causeway International Value Fund Review for Month Ended February 29, 2024

Commentary Highlights

- An extended rally in technology stocks led equity markets in February.
- The valuation discounts of non-US developed equity markets versus the US are, in our view, only partially attributable to sector differences and greater capital efficiency (higher returns on invested capital).
- We continue to focus on the long-term rewards from operational restructuring. In our experience, capable and motivated management teams of underearning companies can—and often do—boost returns to shareholders.

Performance Review

An extended rally in technology stocks led equity markets higher in February. The top performing markets in our investable universe were Israel, China, and South Korea. The worst performing markets were Austria, Portugal, and Finland. The best performing sectors in the MSCI EAFE Index ("Index") were information technology, consumer discretionary, and industrials. The worst performing sectors were utilities, consumer staples, and energy. Currency proved a headwind as major currencies declined against the US dollar.

The Causeway International Value Equity Fund ("Fund"), on a net asset value basis, underperformed the Index during the month, due primarily to industry group allocation (a byproduct of our bottom-up stock selection process). On a gross return basis, holdings in the household & personal products and insurance industry groups, along with an underweight position in the automobiles & components industry group, detracted from relative performance. Holdings in the capital goods, transportation, and banks industry groups offset some of the underperformance compared to the Index. The largest detractor was household & personal care products company, Reckitt Benckiser Group (United Kingdom). Additional notable detractors included pharmaceuticals & biotechnology company, Roche Holding AG (Switzerland), and travel & tourism information technology provider, Amadeus IT Group SA (Spain). The top contributor to return was jet engine manufacturer, Rolls-Royce Holdings Plc (United Kingdom). Other notable contributors included banking & financial services company, Barclays PLC (United Kingdom), and banking & financial services company, UniCredit S.p.A. (Italy).

Quarterly Investment Outlook

The valuation discounts of non-US developed equity markets versus the US are, in our view, only partially attributable to sector differences and greater capital efficiency (higher returns on invested capital). We are skeptical that the upward valuation re-rating the US market experienced in 2023 can persist in 2024, largely due to shrinking global monetary liquidity. US money supply, as measured by M2*, continues to decrease as savings decline and major central banks reduce their balance sheets via quantitative tightening.

A slow interest rate cutting cycle leaves plenty of room for successful stock selection, as economic uncertainty generally creates price volatility, especially in cyclical sectors. Given the fear of re-igniting inflation, we believe major central banks must

keep real interest rates positive in this cycle and aim for an equilibrium rate to maximize economic growth at a stable approximately 2% inflation rate. Positive real interest rates typically bode well for the value investment style, especially when coupled with intensive fundamental research.

We continue to focus on the long-term rewards from operational restructuring. In our experience, capable and motivated management teams of underearning companies can—and often do—boost returns to shareholders. Importantly, we aim to identify and buy these stocks many months before markets perceive positive catalysts. Many of the global and international portfolio holdings we expect to outperform in 2024 add, in our view, operational restructuring upside potential to the portfolio across a range of sectors, such as consumer discretionary, industrials, consumer staples and information technology.

*M2 is a measure of the U.S. money stock that includes M1 (currency and coins held by the non-bank public, checkable deposits, and travelers' checks) plus savings deposits (including money market deposit accounts), small time deposits under \$100,000, and shares in retail money market mutual funds.

The market commentary expresses the portfolio managers' views as of the date of this report and should not be relied on as research or investment advice regarding any stock. These views and any portfolio holdings and characteristics are subject to change. There is no guarantee that any forecasts made will come to pass. Any securities identified and described do not represent all of the securities purchased, sold or recommended for the Fund. Index returns, if any, are gross of withholding taxes, assume reinvestment of dividends and capital gains, and assume no management, custody, transaction or other expenses. The reader should not assume that an investment in any securities identified was or will be profitable. MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products.

To determine if the Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expenses. This and other information can be found in the Fund's full or summary prospectus, which can be obtained by calling 1-866-947-7000 or visit us online at www.causewayfunds.com. Please read the prospectus, or the summary prospectus, carefully before you invest or send money.

The Fund's benchmark, the MSCI EAFE Index, is a free float-adjusted market capitalization weighted index, designed to measure developed market equity performance excluding the U.S. and Canada, consisting of stock markets in Europe, Australasia, and the Far East. The MSCI EAFE Value Index is a free float-adjusted market capitalization weighted index, designed to measure large and mid cap securities exhibiting overall value style characteristics across developed market equity performance excluding the U.S. and Canada, consisting of stock markets in Europe, Australasia, and the Far East. The Indices are gross of withholding taxes, assume reinvestment of dividends and capital gains, and assume no management, custody, transaction, or other expenses. It is not possible to invest directly in an index.

Risk Disclosure

Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with equity investing, international investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. There is no assurance that a Fund will achieve its stated objectives.

The Morningstar Medalist Rating is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a riskadjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about the Medalist Ratings, including their methodology, please go to <http://global.morningstar.com/managerdisclosures>.

The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate.
