## Investment Objective

The investment objective of the Fund is to seek long-term growth of capital in emerging markets.

## Investment Strategy

The Investment Manager uses a quantitative investment approach to purchase and sell investments for the Fund. The Fund invests in companies in ten or more emerging markets. If the Fund invests in a country, the percentage of the Fund's total assets attributable to that country is not expected to be greater than the weight of that country as represented in the MSCI Emerging Markets Index, plus 5 percentage points, or less than the weight of that country in the MSCI Emerging Markets Index minus 5 percentage points.

## Fund Features

- Actively managed, tracking-error oriented, quantitative strategy
- Combines bottom-up and top-down factors in security selection
- Supports strict risk controls in stock selection process
- Provides diversification benefits to a developed markets portfolio

## Market commentary

Bolstered by easing Covid-19 restrictions in China, emerging market equity prices rebounded during the fourth quarter. The MSCI Emerging Markets Index ("Index") returned 6.66% in local currency terms during the period. The emerging Asia region was the strongest-performing region within the Index in local currency terms. Communication services, health care, and materials were the strongest-performing sectors within the Index. Utilities, energy, and consumer staples were the weakest-performing sectors in the fourth quarter.

The Causeway Emerging Markets UCITS Fund ("Fund") underperformed the Index during the quarter. We use both bottom-up "stock-specific" and top-down factor categories to seek to forecast alpha for the stocks in the Fund's investable universe. Our bottom-up technical and growth factors were negative indicators during the quarter. Our valuation and competitive strength factors were positive indicators. Of our top-down factors, macroeconomic, sector, and currency were negative indicators. Country was a positive indicator during the quarter.

Over the quarter, Fund holdings in the emerging Asia region detracted from relative performance, due primarily to negative stock selection in China. In the emerging Europe, Middle East, and Africa ("EMEA") region, positioning in the United Arab Emirates and Saudi Arabia detracted from relative performance. Positioning in emerging Latin America modestly detracted from performance during the period. From a sector perspective, the largest detractors from relative performance were information technology, consumer staples, and materials. The greatest contributors to relative performance were financials, utilities, and real estate. The largest stock-level detractors from relative performance included overweight positions in polysilicon manufacturer, Daqo New Energy (China), bank, Banco do Brasil SA (Brazil), and solar panel manufacturer, Tongwei Co (China). The greatest stock-level contributors to relative performance included overweight positions in online audio entertainment platform, Tencent Music Entertainment Group (China), airline, Turk Hava Yollari AO (Turkey), and online lending platform, 360 Digitech (China).

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost and current performance may be lower than the performance quoted. Returns greater than one year are average annual total returns. All information is as of the date shown. Investment performance reflects the Investment Manager's voluntary undertaking to limit ongoing charges during certain periods. In the absence of such voluntary undertaking, total return would be reduced. MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products. Returns greater than one year are annualized.

The MSCI Emerging Markets Index in USD (Gross) is a free float-adjusted market capitalization index, designed to measure equity market performance of emerging markets, consisting of different emerging country indices. The Index is gross of withholding taxes, assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. It is not possible to invest directly in an index. Accounts will not be invested in all the constituent securities of their benchmark indices at all times, and may hold securities not included in their benchmark indices.

Causeway Capital Management LLC is not registered as an investment adviser outside of the United States. Note that Causeway Funds plc and the Fund may not be authorised for distribution by the relevant central bank or similar securities or financial services regulatory authority in certain jurisdictions. Nothing in these materials constitutes any offer to sell or the solicitation of any offer to buy securities in or from any territory where the same would require compliance with any regulatory filing or like requirement or where the same would constitute an offence. No subscription for shares of the Fund may be accepted without completion of a final Fund Application, which may only be obtained upon further request and which may include additional representations and information relevant for a particular jurisdiction.

Investing involves risk, including possible loss of principal. International investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. These risks are further enhanced for investments in smaller capitalization companies. The Fund is also subject to, among other risks, market fluctuations and security selection risk, quantitative risk and derivatives risk. Current and future securities exposures are subject to risk.

Holdings are subject to change. There is no assurance that any securities exposures mentioned will remain in or out of the Fund. A decision may be taken at any time to terminate the arrangements made for the marketing of the UCITS/relevant sub-fund in any EEA Member State in which it is currently marketed. In such circumstances, shareholders in the affected EEA Member State will be notified of this decision and will be provided with the opportunity to redeem their shareholding in the UCITS/relevant sub-fund.
