DM = Developed Markets EM = Emerging Markets FY2 P/E is the weighted harmonic average 2-year analysts' consensus forecast price-to-earnings ratio. Price-to-book value ratio is weighted harmonic average and dividend yield is a weighted average. Return on Equity is calculated as a weighted average, winsorized using maximum Return on Equity figures at 3 standard deviations from the mean (winsorization is a statistical technique intended to remove the impact of outliers). Characteristics are derived from a representative account within the International Opportunities strategy.

Causeway Capital Management LLC (Causeway) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Causeway has been independently verified for the periods June 11, 2001 through December 31, 2024.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The International Opportunities Composite has had a performance examination for the periods June 30, 2007 through December 31, 2024. The verification and performance examination reports are available upon request.

The Firm, Causeway, is organized as a Delaware limited liability company and began operations in June 2001. It is registered as an investment adviser with the U.S. Securities and Exchange Commission under the Investment Advisers Act of 1940. Registration does not imply a certain level of skill or training. Causeway manages international, global, and emerging markets equity assets primarily for institutional clients including corporations, pension plans, sovereign wealth funds, superannuation funds, public retirement plans, Taft-Hartley pension plans, endowments and foundations, mutual funds and other collective investment vehicles, charities, private trusts and funds, model and SMA programs, and other institutions. The Firm includes all discretionary and non-discretionary accounts managed by Causeway.

The International Opportunities Composite includes all U.S. dollar denominated, discretionary accounts in the international opportunities strategy that are not constrained by socially responsible investment restrictions. The international opportunities strategy seeks long-term growth of capital through investment primarily in equity securities of companies in developed and emerging markets outside the U.S. using Causeway's asset allocation methodology to determine developed and emerging weightings, and using Causeway's international value equity strategy or Causeway International Value Fund for the developed portion of the portfolio and Causeway's emerging markets strategy or Causeway Emerging Markets Fund for the emerging markets portion of the portfolio. The international value equity strategy seeks long-term growth of capital and income through investment primarily in equity securities of companies in developed countries located outside the U.S. The emerging markets equity strategy seeks long-term growth of capital through investment primarily in equity securities of companies in emerging markets. New accounts are included in the International Opportunities Composite after the first full month under management. Terminated accounts are included in the International Opportunities Composite through the last full month under management. A complete list and description of Firm composites, a list of limited distribution pooled fund descriptions, and a list of broad distribution pooled funds are available upon request.

Account returns are calculated daily. Monthly account returns are calculated by geometrically linking the daily returns. The return of the International Opportunities Composite is calculated monthly by weighting monthly account returns by the beginning market values. Valuations and returns are computed and stated in U.S. dollars. Returns include the reinvestment of interest, dividends and any capital gains. Returns are calculated gross of withholding taxes on dividends, interest income, and capital gains. The Firm's policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Past performance is no guarantee of future performance. Composite dispersion, if applicable, is calculated using the equal-weighted standard deviation of all portfolios that were included in the International Opportunities Composite for the entire year. The three-year annualized ex-post standard deviation quantifies the variability of the composite or benchmark returns over the preceding 36-month period. Gross returns were used to calculate all risk measures presented in this GIPS Composite Report.

The International Opportunities Composite's benchmark is the MSCI ACWI ex USA Index, which is a free float-adjusted market capitalization weighted index, designed to measure the equity market performance of developed and emerging markets excluding the U.S. market, consisting of 46 country indices. The Index is gross of withholding taxes, assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. Accounts in the International Opportunities Composite may invest in countries not included in the MSCI ACWI ex USA Index, and may use different benchmarks.

Gross-of-fees returns are presented before management, performance and custody fees but after trading expenses. Net-of-fees returns are presented after the deduction of actual management fees, performance-based fees, and all trading expenses, but before custody fees. For bundled fee portfolios, net-of-fees returns are presented after the deduction of actual management fees, all trading expenses, custody fees, and fund accounting fees. Causeway's management fee schedules are described in its Firm brochure pursuant to Part 2 of Form ADV. The basic separate account annual fee schedule for international opportunities assets under management is: 0.65% of the first \$200 million and 0.50% thereafter. The highest expense ratio and the highest all-in fee for a series of a private commingled vehicle, which is included in the International Opportunities Composite, is 0.65%. The fee schedule for the private commingled vehicle is an all-in fee, which covers normal operating fees and expenses of the private commingled vehicle, and the management fee paid to Causeway as the investment manager. The highest expense ratio and the highest all-in fee for a collective investment trust (CIT), which is included in the International Opportunities Composite, is 1.05%. The fee schedule for the CIT is an all-in fee, and represents fees paid to the trustee of the CIT, which covers normal operating fees and expenses of the CIT, and compensation to the trustee and to Causeway as the investment manager. Accounts in the International Opportunities Composite may have different fee schedules, and certain accounts may pay performance-based fees or bundled fees. Bundled fees include management, custody, and fund accounting fees. Causeway may enter into performance-based fee arrangements. While the specific terms of these arrangements are negotiated with each client, they typically provide for a base fee equal to a percentage of the average market value of the account during each quarter plus a performance fee that may be (i) an additional percentage of the market value of the account if the total return of the account exceeds an agreed benchmark over an agreed period, or (ii) a percentage of account profits.

This presentation expresses Causeway's views as of April 2026 and should not be relied on as research or investment advice regarding any stock. These views and any portfolio holdings and characteristics are subject to change. There is no guarantee that any forecasts made will come to pass. Forecasts are subject to numerous assumptions, risks, and uncertainties, which change over time, and Causeway undertakes no duty to update any such forecasts. Information and data presented has been developed internally and/or obtained from sources believed to be reliable; however, Causeway does not guarantee the accuracy, adequacy, or completeness of such information. Our investment portfolios may or may not hold the securities mentioned, and the securities identified and described do not represent all of the securities purchased, sold or recommended for client accounts. The reader should not assume that an investment in the securities identified was or will be profitable.

Past performance is no guarantee of future performance. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Investments in smaller companies involve additional risks and typically exhibit higher volatility. Please see below for additional risks associated with investing in Causeway's strategies.

The benchmark for the international opportunities strategy is the MSCI ACWI ex USA Index, which is a free float-adjusted market capitalization weighted index, designed to measure the equity market performance of developed and emerging markets excluding the U.S. market, consisting of 22 developed country indices and 24 emerging market country indices. The MSCI ACWI ex USA Value Index captures large and mid cap securities exhibiting overall value style characteristics. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield. The MSCI ACWI ex USA Growth Index captures large and mid cap securities exhibiting overall growth style characteristics. The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend.

The indices are gross of withholding taxes, assume reinvestment of dividends and capital gains, and assume no management, custody, transaction or other expenses. It is not possible to invest directly in these indices. MSCI has not approved, reviewed, or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products. Accounts will not be invested in all the constituent securities of their benchmark indices at all times, and may hold securities not included in their benchmark indices.
