Snapshot

as of March 31, 2025

ASSETS*

Total Assets (USD)	28,899,364,405
--------------------	----------------

* Total strategy assets differs from total Composite assets because certain accounts are in different Composites

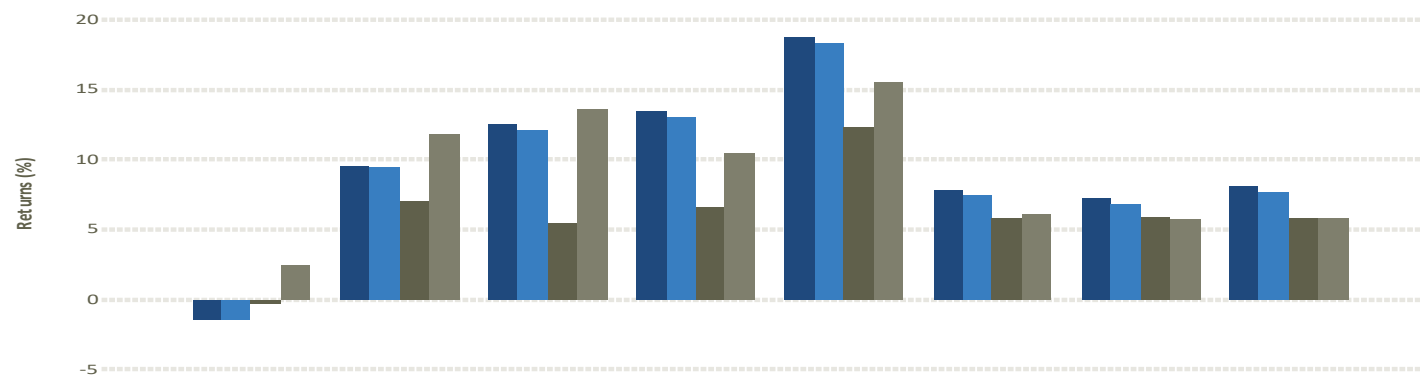

CHARACTERISTICS

	International Value	MSCI EAFE	MSCI EAFE Value
No. of Holdings	70	694	421
Wtd Avg Mkt Cap (Mn)	68,968	78,253	72,292
FY2 P/E	11.0x	13.1x	10.3x
P/B Value	1.5x	1.9x	1.3x
Dividend Yield	2.9%	3.0%	4.2%
Return on Equity	13.6%	12.3%	11.3%

Wtd Avg Mkt Cap is a weighted average of the total market capitalization of stocks in the portfolio or index. FY2 P/E is the weighted harmonic average 2-year analysts' consensus forecast price-to-earnings ratio. Price to earnings is a ratio for valuing a company that measures its current share price relative to its per-share earnings. Price-to-book (P/B) value evaluates a firm's market value relative to its book value and is a weighted harmonic average. Return on Equity measures how efficiently a company is generating income from the equity investments of its shareholders. Return on Equity is calculated as a weighted average, winsorized using maximum Return on Equity figures at 3 standard deviations from the mean (winsorization is a statistical technique intended to remove the impact of outliers). Characteristics are derived from a representative account using the International Value Equity strategy.

Performance

COMPOSITE PERFORMANCE for the periods ended March 31, 2025

	Month	Quarter	1 Year	3 Years	5 Years	7 Years	10 Years	Since Inception
International Value (Gross)	-1.41	9.50	12.47	13.47	18.77	7.87	7.19	8.12
International Value (Net)	-1.44	9.41	12.08	13.06	18.33	7.46	6.77	7.69
MSCI EAFE (Gross)	-0.29	7.01	5.41	6.60	12.31	5.85	5.91	5.79
MSCI EAFE Value (Gross)	2.49	11.77	13.62	10.46	15.52	6.07	5.72	5.85

Inception Date: 06/11/2001

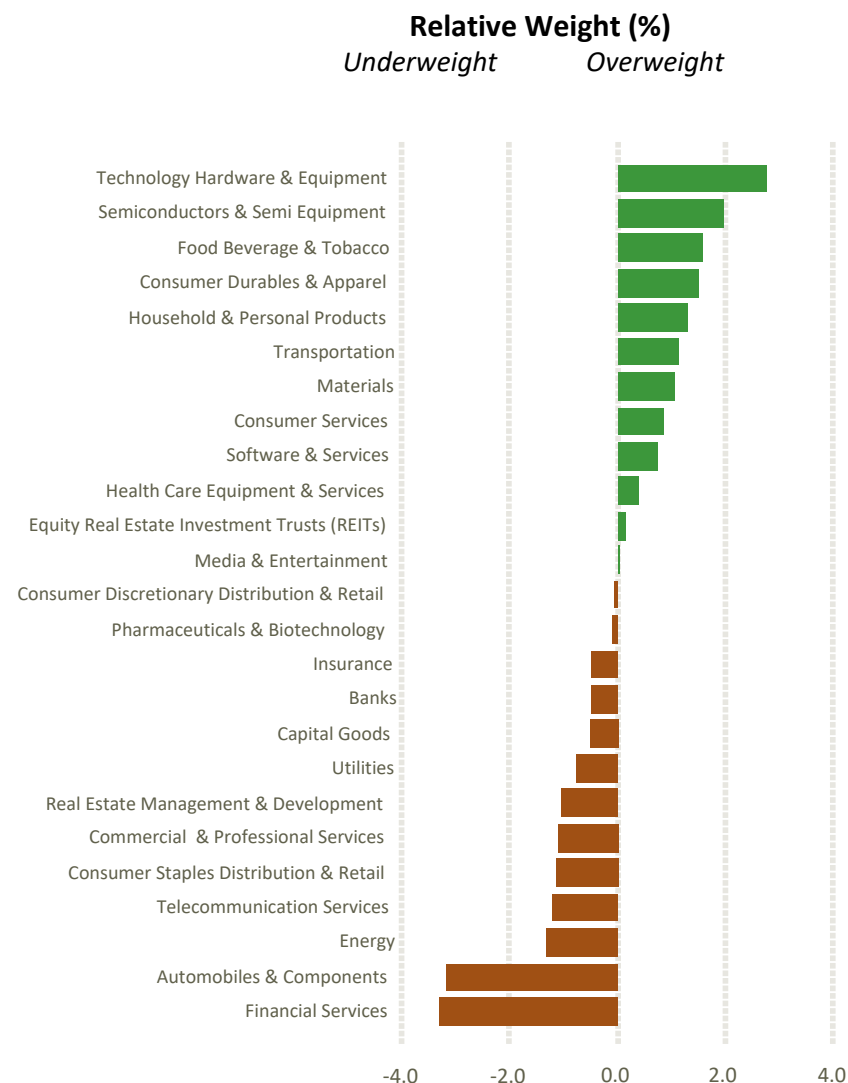

Returns are in USD. Index returns are presented gross or net of tax withholdings on income and dividends. The gross composite performance presented is before management and custody fees but after trading expenses. Net composite performance is presented after the deduction of actual management fees, performance-based fees, and all trading expenses, but before custody fees. Composite performance is primarily net of foreign dividend withholdings. Annualized for periods greater than one year. See end of presentation for important disclosures regarding the composite. This information supplements the attached composite presentation. Performance quoted is past performance. Past performance is not an indication of future results.

Representative Account Industry Group Attribution

REPRESENTATIVE ACCOUNT vs. MSCI EAFE (Gross) for the quarter ended March 31, 2025

Stock Selection & Interaction: Positive - Relative outperformance (3.13%) was due to holdings in pharmaceuticals & biotechnology, semiconductors & semi equipment, and materials; relative underperformance was due to holdings in consumer durables & apparel, food beverage & tobacco, and consumer services.

Industry Allocation: Neutral - Relative outperformance (0.04%) resulted from an overweighting in media & entertainment, as well as an underweighting in automobiles & components and commercial & professional services; relative underperformance resulted from an overweighting in semiconductors & semi equipment and technology hardware & equipment, as well as an underweighting in energy.

Before investment advisory fees. Past performance is not an indication of future results.

Investment Outlook – 2Q 2025

Financial Markets and Economy:

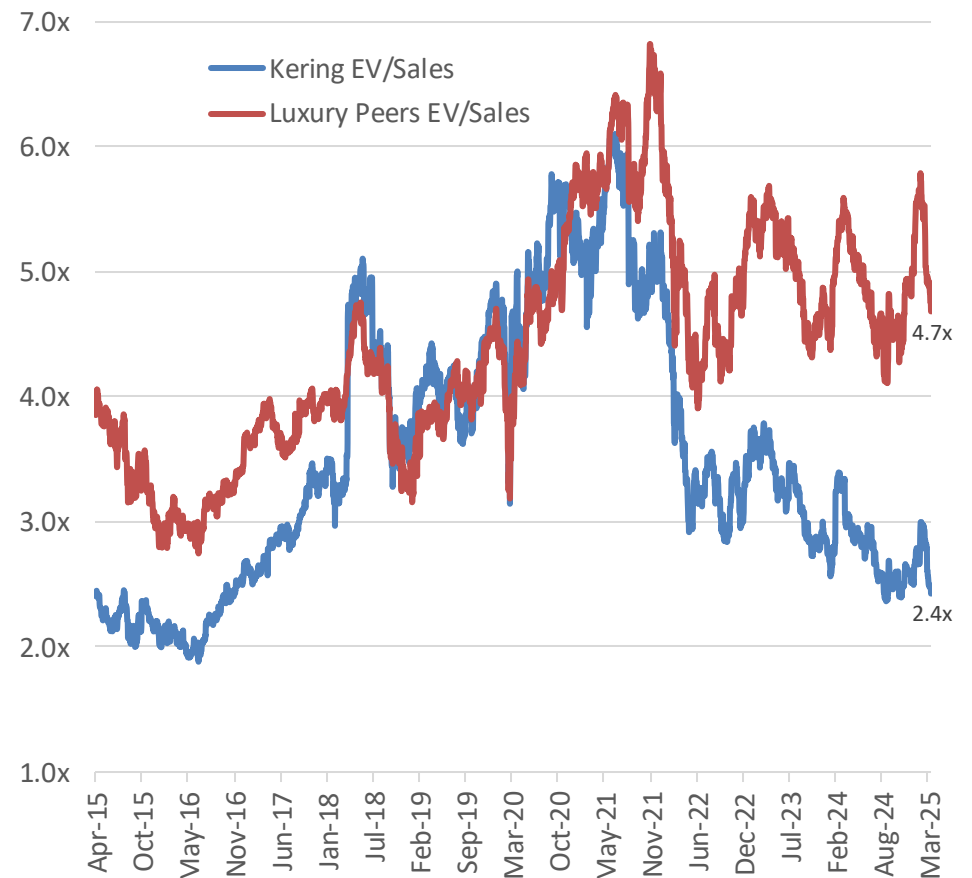

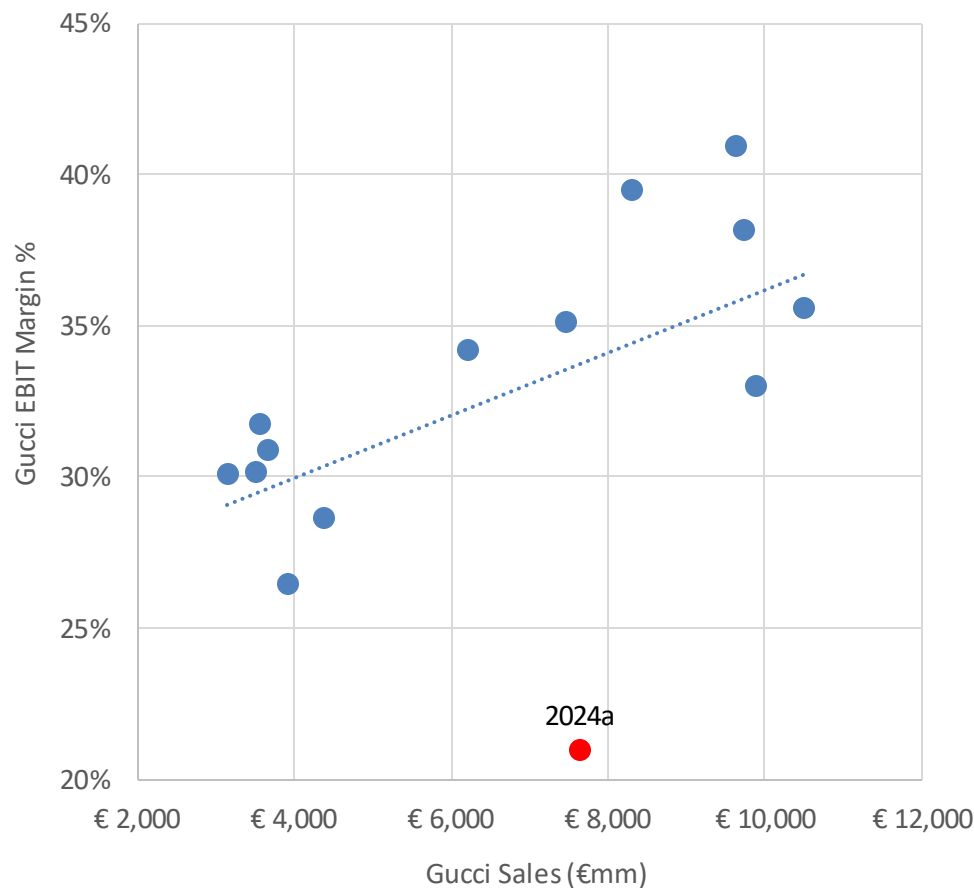

- “Liberation Day” tariff announcement could weigh on global equity markets and may continue to cause volatility until uncertainty around potential retaliation subsides.
- Best case: The Trump Administration achieves its desired response from trading partners, leading to a reduction or elimination of tariffs on compliant countries. This could boost corporate and investor confidence, encouraging capital expenditures and supporting future earnings growth.
- Worst case: Major trade partners retaliate with punitive tariffs, deepening the rift between the U.S. and its global allies, with protectionism displacing the current WTO-led order. By early 2026, wealth destruction and inflation could affect nearly every region worldwide.
- While the Trump Administration has focused on trade in goods during the first quarter of 2025, U.S. services—where trade balances are generally positive—are now increasingly vulnerable to retaliation by trading partners.
- Tariff pressures and heightened European defense spending obligations could drive further EU integration, potentially revitalizing a region of approximately 450 million people. We expect greater risk-sharing across the eurozone, underpinned by Germany’s strong balance sheet and willingness to support expanded borrowing.
- It remains unclear whether incremental European defense and infrastructure spending will be sufficient to spark a sustained industrialization boom, especially if proposed tariffs persist and retaliation escalates.
- While the Trump administration has stated they want a lower yield on the 10-Year Treasury, inflation may remain elevated as tariffs ripple through global supply chains. The resulting risk of stagflation presents a complex challenge for central banks.
- Chinese authorities continue to emphasize economic stability, technological innovation, domestic consumption, and regulatory reforms. However, the sharp rise in U.S. tariffs on Chinese imports—and on goods from other Asian hubs such as Vietnam—poses a growing threat to China’s GDP growth trajectory.

Portfolio Outlook:

- Despite the challenging macroeconomic backdrop, we remain confident in our ability to upgrade portfolios by capitalizing on share price weakness in high-quality stocks. We aim to take advantage of market dislocations to increase exposure to companies we believe will withstand tariff pressures and deliver attractive multi-year returns. Companies with pricing power and limited competition are especially compelling to us in this environment.
- Certain cyclical stocks now offer some of the lowest valuations since 2020 and are rising in our risk-adjusted return rankings. We are also targeting companies that provide mission-critical services to enterprises—firms that should see robust order growth regardless of tariff stabilization. Many senior management teams continue to emphasize the need for investment in digitalization and cloud transitions to stay competitive, signaling renewed demand for IT services from enterprise customers.
- Healthcare remains a promising sector to us, especially in a broader market decline. While pharmaceuticals were excluded from the April 2 tariff announcement, they remain vulnerable to future trade actions.

Kering SA: Led By A New Creative Director, Gucci Sales and Profit Margins Appear Poised To Rebound

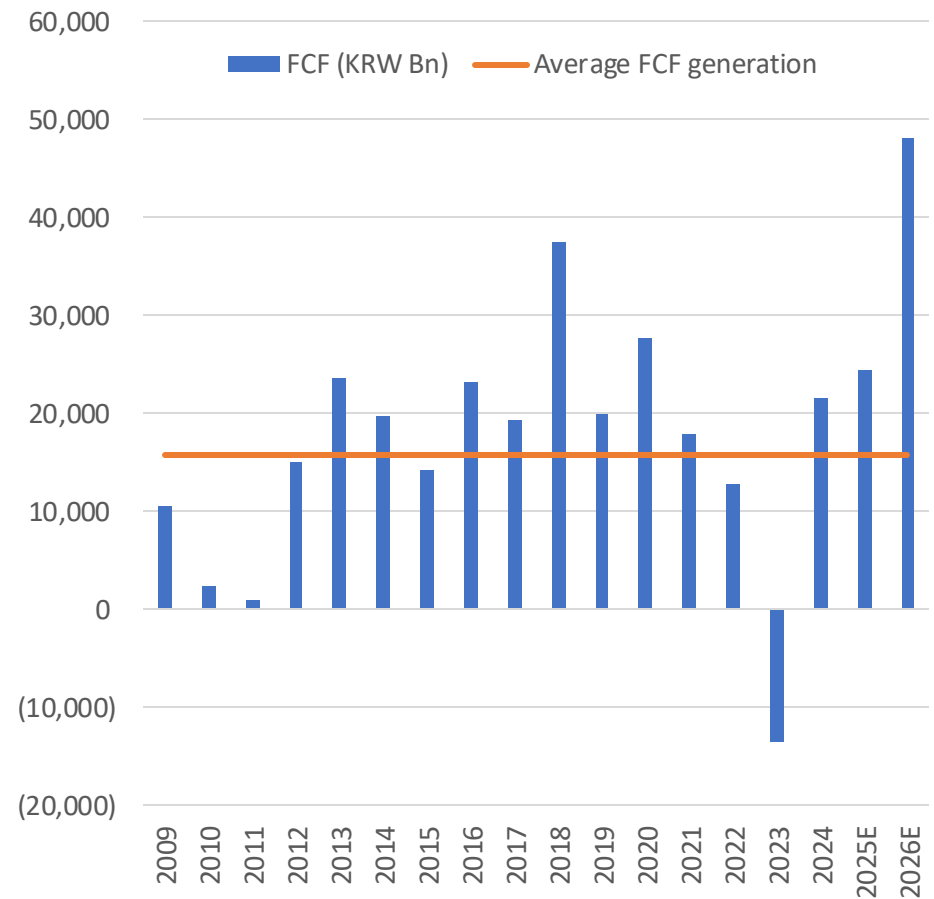

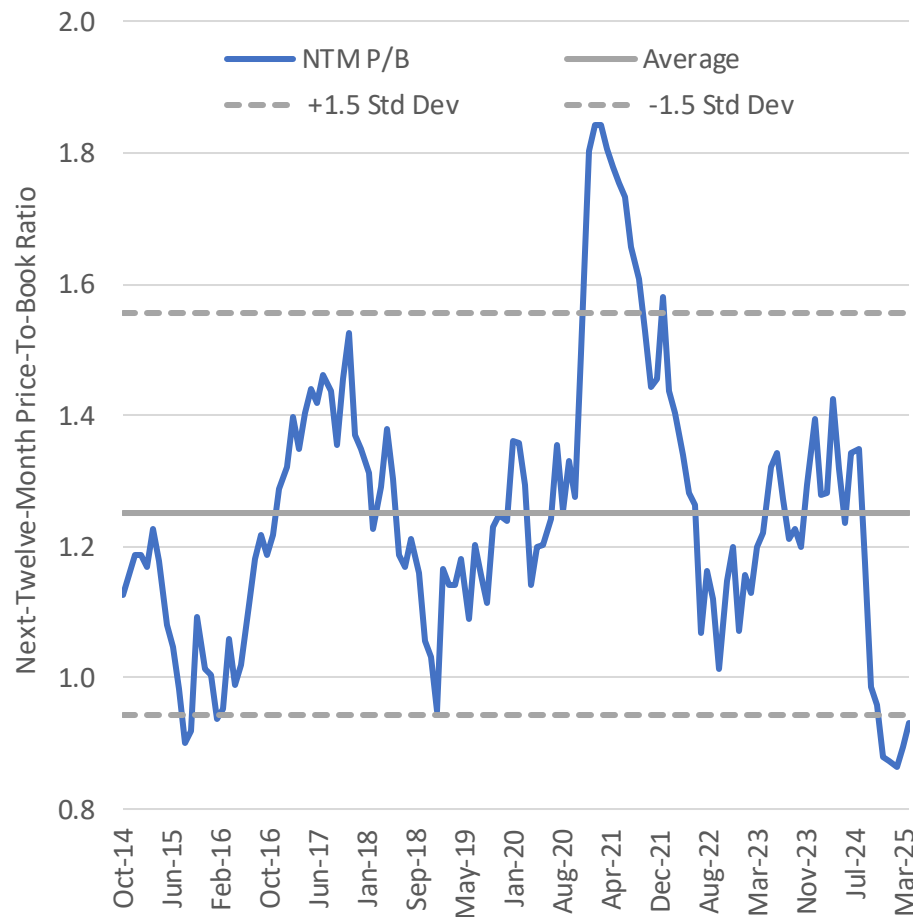

WITH VALUATIONS WELL BELOW PEERS, WE BELIEVE KERING OFFERS ATTRACTIVE UPSIDE POTENTIAL

Data as of March 31, 2025. Sources: Company reports, Causeway analysis. This material is solely for client use and may not be reproduced without Causeway's consent. Holdings are subject to change

Disclosures

This presentation is as of March 2025 and should not be relied on as research or investment advice regarding any investment. These views and characteristics are subject to change, and there is no guarantee that any forecasts made will come to pass. Forecasts are subject to numerous assumptions, risks and uncertainties which change over time, and Causeway undertakes no duty to update any such forecasts. Our investment portfolio may or may not hold the securities mentioned, and the securities identified and described do not represent all of the securities purchased, sold or recommended for client accounts. The recipient should not assume that an investment in the securities identified was or will be profitable. Information and data presented has been developed internally and/or obtained from sources believed to be reliable; however, Causeway does not guarantee the accuracy, adequacy or completeness of such information.

Past performance is no guarantee of future performance. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Investments in smaller companies involve additional risks and typically exhibit higher volatility.

Index definitions: The MSCI EAFE Index is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the U.S. & Canada. The MSCI World Index captures large and mid-cap representation across 23 Developed Markets countries. The MSCI World ex USA Index captures large and mid-cap representation across 22 of 23 Developed Markets countries - excluding the United States. The MSCI Emerging Markets Index captures large and mid cap representation across 24 Emerging Markets (EM) countries. The MSCI Value variations of the indices are a subset of the referenced index, and target 50% coverage of the respective indices, with value investment style characteristics for index construction using three variables: book value to price, 12-month forward earnings to price, and dividend yield. The MSCI Growth variations of the indices are also a subset of the referenced index, and target the remaining 50% coverage of the respective indices. The MSCI Europe Index captures large and mid cap representation across 15 Developed Markets countries in Europe. The MSCI USA Index is designed to measure the performance of the large and mid cap segments of the US market. With 619 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in the US. The performance of the indices is gross of withholding taxes, assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. The MSCI World ex USA Index captures large and mid-cap representation across 22 of 23 Developed Markets countries - excluding the United States. It is not possible to invest directly in an index. MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products. Accounts in the strategy may invest in countries not included in the MSCI EAFE Index. The Standard and Poor's 500, or simply the S&P 500, is a stock market index tracking the stock performance of 500 of the largest companies listed on stock exchanges in the United States. Accounts will not be invested in all the constituent securities of their benchmark indices at all times, and may hold securities not included in their benchmark indices.

N/M – Not considered meaningful for 5 portfolios or less for the full year. ^a Not covered by the report of independent accountants. ^b N/A as period since composite inception is less than 36 months.

^c Partial period shown (June 11, 2001 - December 31, 2001).

Important Disclosures

Causeway Capital Management LLC (Causeway) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Causeway has been independently verified for the periods June 11, 2001 through December 31, 2023.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The International Value Equity Composite (International Composite) has had a performance examination for the periods June 11, 2001 through December 31, 2023. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The Firm, Causeway, is organized as a Delaware limited liability company and began operations in June 2001. It is registered as an investment adviser with the U.S. Securities and Exchange Commission under the Investment Advisers Act of 1940. Registration does not imply a certain level of skill or training. Causeway manages international, global, and emerging markets equity assets primarily for institutional clients including corporations, pension plans, sovereign wealth funds, superannuation funds, public retirement plans, Taft-Hartley pension plans, endowments and foundations, mutual funds and other collective investment vehicles, charities, private trusts and funds, model and SMA programs, and other institutions. The Firm includes all discretionary and non-discretionary accounts managed by Causeway.

The International Composite includes all U.S. dollar denominated, discretionary accounts in the international value equity strategy which do not apply a minimum market capitalization requirement of \$5 billion or higher, permit investments in South Korean companies after October 2003, do not regularly experience daily external cash flows, and are not constrained by socially responsible investment restrictions. The international value equity strategy seeks long-term growth of capital and income through investment primarily in equity securities of companies in developed countries located outside the U.S. New accounts are included in the International Composite after the first full month under management, except as noted below. Terminated accounts are included in the International Composite through the last full month under management. From June 2001 through November 2001, the International Composite included a non-fee-paying account with total assets of approximately \$2 million. This was the sole account in the International Composite from June through September 2001. The account was included in the International Composite at account inception because it was fully invested at inception. A complete list and description of Firm composites, a list of limited distribution pooled fund descriptions, and a list of broad distribution pooled funds are available upon request.

Account returns are calculated daily. Monthly account returns are calculated by geometrically linking the daily returns. The return of the International Composite is calculated monthly by weighting monthly account returns by the beginning market values. Valuations and returns are computed and stated in U.S. dollars. Returns include the reinvestment of interest, dividends and any capital gains. Returns are calculated gross of withholding taxes on dividends, interest income, and capital gains. The Firm's policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Past performance is no guarantee of future performance. Composite dispersion, if applicable, is calculated using the equal-weighted standard deviation of all portfolios that were included in the International Composite for the entire year. The three-year annualized ex-post standard deviation quantifies the variability of the composite or benchmark returns over the preceding 36-month period.

The MSCI EAFE Index benchmark is a free float-adjusted market capitalization weighted index, designed to measure developed market equity performance excluding the U.S. and Canada, consisting of 21 stock markets in Europe, Australasia, and the Far East. The Index is gross of withholding taxes, assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. Accounts in the International Composite may invest in countries not included in the MSCI EAFE Index.

Gross-of-fees returns are presented before management, performance and custody fees but after trading expenses. Net-of-fees returns are presented after the deduction of actual management fees, performance-based fees, and all trading expenses, but before custody fees. For bundled fee portfolios, net-of-fees returns are presented after the deduction of actual management fees, all trading expenses, custody fees, and fund accounting fees. Causeway's management fee schedules are described in its Firm brochure pursuant to Part 2 of Form ADV. The basic separate account annual fee schedule for international value equity assets under management is: 0.60% of the first \$200 million and 0.45% thereafter. The highest fee schedule for two series of a private commingled vehicle, which are included in the International Composite, is 0.75% on the first \$10 million, 0.65% on the next \$40 million, and 0.50% thereafter. The highest expense ratio and the highest all-in fee for a collective investment trust (CIT), which is included in the International Composite, is 0.95%. The fee schedule for the CIT is an all-in fee, and represents fees paid to the trustee of the CIT, which covers normal operating fees and expenses of the CIT, and compensation to the trustee and to Causeway as the investment manager. Accounts in the International Composite may have different fee schedules or pay performance-based fees or bundled fees. Bundled fees include management, custody, and fund accounting fees.

MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations, and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products.

Important Disclosures

This presentation expresses Causeway's views as of April 2025 and should not be relied on as research or investment advice regarding any stock. These views and any portfolio holdings and characteristics are subject to change. There is no guarantee that any forecasts made will come to pass. Forecasts are subject to numerous assumptions, risks, and uncertainties, which change over time, and Causeway undertakes no duty to update any such forecasts. Information and data presented has been developed internally and/or obtained from sources believed to be reliable; however, Causeway does not guarantee the accuracy, adequacy, or completeness of such information. Our investment portfolios may or may not hold the securities mentioned, and the securities identified and described do not represent all of the securities purchased, sold or recommended for client accounts. The reader should not assume that an investment in the securities identified was or will be profitable.

Past performance is no guarantee of future performance. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Investments in smaller companies involve additional risks and typically exhibit higher volatility. Please see below for additional risks associated with investing in Causeway's strategies.

The benchmark index for the international value strategy is the MSCI EAFE Index. This Index is a free float-adjusted market capitalization weighted index, designed to measure developed market equity performance excluding the U.S. and Canada, consisting of 21 stock markets in Europe, Australasia, and the Far East. The MSCI EAFE Value Index captures large and mid-cap securities exhibiting overall value style characteristics across the MSCI EAFE Index markets. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield. The MSCI EAFE Growth Index captures large and mid-cap securities exhibiting overall growth style characteristics across the MSCI EAFE Index markets. The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend.

The indices are gross of withholding taxes, assume reinvestment of dividends and capital gains, and assume no management, custody, transaction or other expenses. It is not possible to invest directly in these indices. MSCI has not approved, reviewed, or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products. Accounts will not be invested in all the constituent securities of their benchmark indices at all times, and may hold securities not included in their benchmark indices.
