

Emerging Markets Fund

FLASH REPORT • June 30, 2025

FUND DETAILS as of June 30, 2025

| | Ticker | CUSIP | Net Expenses | Gross Expenses | Net Assets (\$) |
|--------------------------|--------|-----------|--------------|----------------|-----------------|
| EM Fund - Instl Class | CEMIX | 149498107 | 1.10% | 1.14% | 1,819,469,471 |
| EM Fund - Investor Class | | 149498206 | 1.35% | 1.39% | 508,938,579 |

PERFORMANCE

as of June 30, 2025, Inception date: March 29, 2007

PRIOR QUARTER PERFORMANCE

as of March 31, 2025

| | Month | Quarter | Year to Date | 1 Year | 3 Years | 5 Years | 10 Years | Since Inception | 1 Year | 3 Years | 5 Years | 10 Years | Since Inception |
|--------------------------------|-------|---------|--------------|--------|---------|---------|----------|-----------------|--------|---------|---------|----------|-----------------|
| EM Fund - Instl Class (Net) | 8.55% | 15.89% | 16.64% | 14.08% | 14.70% | 9.28% | 5.16% | 4.94% | 7.37% | 4.23% | 9.37% | 3.69% | 4.15% |
| EM Fund - Investor Class (Net) | 8.59% | 15.81% | 16.55% | 13.79% | 14.47% | 9.05% | 4.92% | 4.74% | 7.12% | 4.04% | 9.14% | 3.45% | 3.96% |
| MSCI Emerging Markets (Net) | 6.01% | 11.99% | 15.27% | 15.29% | 9.70% | 6.81% | 4.81% | 4.02% | 8.09% | 1.44% | 7.94% | 3.71% | 3.42% |

Performance greater than one year is annualized. **The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost and current performance may be lower than the performance quoted. For performance as of the most recent month-end, please call 1-866-947-7000.** Investment performance reflects fee waivers. In the absence of such fee waivers, total return would be reduced. Total annual fund operating expenses for the Institutional Class are 1.14% (gross) and are 1.10% (net) after investment adviser fee waiver. Total annual fund operating expenses for the Investor Class are 1.39% (gross) and are 1.35% (net) after investment adviser fee waiver. The waivers are contractual and in effect until 1/31/26. In the absence of such fee waivers, total return would be reduced. Investor Class shares charge up to a 0.25% annual shareholder service fee. Total returns assume reinvestment of dividends and capital gains distributions at net asset value when paid.

TOP 10 ACTIVE HOLDINGS as of June 30, 2025

| Company Name | Active Weight | Country | Industry Group |
|--------------------------------------|---------------|-----------|--|
| 1. China Construction Bank Corp. | 1.8 | China | Banks |
| 2. REC Ltd. | 1.2 | India | Financial Services |
| 3. Bharti Airtel Ltd. | 1.0 | India | Telecommunication Services |
| 4. Tencent Holdings Ltd. | 1.0 | China | Media & Entertainment |
| 5. Pop Mart International Group Ltd. | 0.9 | China | Consumer Discretionary Distribution & Retail |
| 6. Sea Ltd. | 0.9 | Singapore | Media & Entertainment |
| 7. NetEase, Inc. | 0.8 | China | Media & Entertainment |

ATTRIBUTION ANALYSIS: CONTRIBUTORS TO RELATIVE PERFORMANCE BY SECTOR for the quarter ended June 30, 2025

Stock Selection & Interaction: Positive - Relative outperformance (4.85)
Sector Allocation: Negative - Relative underperformance (-0.56)

This chart shows where the Fund's investments in an industry group performed better or worse than the industry group in the benchmark index during the period. Attribution is based on the return of the Fund's holdings gross of management fees and other expenses and before any Fund fair valuation. Past performance is not an indication of future results.

Emerging Markets Fund

EMERGING MARKETS UNIVERSE - FACTOR PERFORMANCE for the quarter ended June 30, 2025

Factors Driving Security Selection:

Bottom-Up Factors (75%)

- Valuation
- Earnings growth
- Technical Indicators
- Competitive Strength
- Corporate Events

Top-Down Factors (25%)

- Macroeconomic
- Currency
- Country/Sector Aggregate

The Causeway emerging markets strategy uses quantitative factors that can be grouped into the listed eight categories. The relative return attributed to a factor is the difference between the equally-weighted average return of the highest ranked quintile of companies in the strategy's emerging markets universe based on that factor and that of the lowest - ranked quintile of companies. Holdings are subject to change.

Know Your Portfolio - Use Risk Lens

To determine if the Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expenses before investing. Please read the full or summary prospectus carefully before you invest or send money. To obtain additional information, call 1-866-947-7000 or visit us online at www.causewayfunds.com.

Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with equity investing, international investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Current and future holdings are subject to risk. There is no guarantee that securities mentioned will remain in or out of the Fund.

The Fund may invest in derivatives, which are often more volatile than other investments and may magnify the Fund's gains or losses.

Wtd Avg Mkt Cap is a weighted average of the total market capitalization of stocks in the portfolio or index. NTM Price/Earnings and Price-to-book value ratio is weighted harmonic average, and return on equity is weighted average. NTM= Next twelve months, LTM= Last twelve months. EPS = earnings per share. Price to earnings is a ratio for valuing a company that measures its current share price relative to its per-share earnings. Price-to-book (P/B) value evaluates a firm's market value relative to its book value. Return on Equity is calculated as a weighted average, winsorized using maximum Return on Equity figures at 3 standard deviations from the mean (winsorization is a statistical technique intended to remove the impact of outliers). Price momentum measures the velocity of price changes over a fixed time period. EPS (Earnings Per Share) Revision is an aggregate measure of changes in earnings forecasts.

Performance attribution charts show where the Fund's investments performed better or worse than the benchmark index during the month. Attribution is based on the return of the Fund's holdings gross of management fees and other expenses, and before any Fund fair valuation. Past performance does not guarantee future results. Attribution is calculated relative to the benchmark index (gross), which benchmark reflects reinvestment of distributions without any deductions for tax withholdings on such distributions.

The Causeway emerging markets strategy uses quantitative factors that can be grouped into seven categories: valuation, earnings growth, technical indicators, macroeconomic, country, sector, and currency. The return attributed to a factor is the difference between the equally weighted average return of the highest ranked quintile of companies in the strategy's emerging markets universe based on that factor and that of the lowest ranked quintile of companies.

The Fund's benchmark, the MSCI Emerging Markets Index, is a free float-adjusted market capitalization weighted index, designed to measure equity market performance of emerging markets, consisting of emerging country indices. The MSCI Emerging Markets Value Index captures large and mid cap securities exhibiting overall value style characteristics across emerging country indices. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield.

Index (Gross) returns are calculated to reflect reinvestment of distributions without any deductions for tax withholdings on such distributions. Index (Net) returns are calculated to reflect reinvestment of distributions after accounting for tax withholdings on such distributions by applying a maximum assumed tax withholding rate. The Fund believes "net" benchmarks are regularly used by other registered investment companies and generally better align with the tax impact on the Fund's foreign security holdings.

The MSCI Emerging Markets Growth Index captures large and mid cap securities exhibiting overall growth style characteristics. The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend.

The Morningstar Medalist Rating is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a riskadjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low,

Emerging Markets Fund

Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about the Medalist Ratings, including their methodology, please go to <http://global.morningstar.com/managerdisclosures>.

The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate.

Causeway Capital Management LLC serves as investment adviser for Causeway International Value Fund. The Fund is distributed by SEI Investments Distribution Co. (SIDCO), which is not affiliated with the Fund or the investment adviser.

Risk Lens is For Investment Professional Use Only.

Risk Lens is a free analytics tool that shows active style, sector, and geographic exposures for stock funds. It shows top risk exposures, top stock weights, and forecast risk measures, and it predicts fund return correlations. <https://analytics.causewaycap.com/>.

Causeway Risk Lens is an investment analysis tool for illustration only. It is not intended to be relied on for investment advice. The risk comparisons are calculated by Causeway's model as of the reference date and are subject to change. Results may vary with each use and over time. There is no guarantee that any forecasts made will come to pass.

Risk Model. Causeway's risk model analyzes multiple factors for each fund holding (excluding certain portfolio ETFs, fixed income, and commodities and other derivatives) to calculate the fund's style exposures, forecast the fund's volatility, and forecast the fund's beta.

Active Style Exposures. The universe is all equity securities globally with average daily trading volume over the prior 90 days above \$500,000. Every security in the universe is scored on each of 8 style dimensions. These standardized scores range from +3 to -3, with a score of 0 being equal to the weighted average score across the universe, +3 being most representative of the style, and -3 being least representative of the style. Fund style exposures are the weighted average of the style scores of all fund holdings. Value, Long-term growth, leverage, liquidity, and size style scores are calculated relative to country. Momentum, volatility, and cyclicity style scores are calculated on a global basis. Active style exposures measure the difference between the fund style exposures and the benchmark style exposures.

Predicted Volatility. Predicted fund level volatility (or annualized standard deviation of returns) is derived from holdings-based fund -level risk exposures, the historical covariance matrix of the risk factor returns, and idiosyncratic

risk estimates.

Predicted Beta. Beta is a measurement of sensitivity to the benchmark index or ETF. Forecast beta is derived from holdings-based fund-level risk exposures, the historical covariance matrix of the risk factor returns, and idiosyncratic risk estimates.

Predicted Tracking Error. Predicted fund level tracking error measures dispersion from the benchmark index or ETF. It is derived from holdings-based fund-level and benchmark or ETF-level risk exposures, the historical covariance matrix of the risk factor returns, and idiosyncratic risk estimates.

Top Risk Policies: Active. Each active systemic risk is ranked from highest to lowest, and the five highest are reported. TCR represents total contribution to risk. TCAR represents total contribution to active risk. The % of Total equals TCAR divided by predicted tracking error.

IMPORTANT: The projections or other information generated by Causeway Risk Lens investment analysis tool regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results.
