Intl Small Cap Fund - Investor Class	CVISX	14949P802	1.35%	1.44%	77,537,042

### PERFORMANCE

as of June 30, 2025, Inception date: October 20, 2014

### PRIOR QUARTER PERFORMANCE

as of March 31, 2025

	Month	Quarter	Year to Date	1 Year	3 Years	5 Years	10 Years	Since Inception	Quarter	1 Year	3 Years	5 Years	10 Years	Since Inception
Intl Small Cap Fund - Instl Class (Net)	5.80%	18.83%	21.56%	23.68%	22.15%	18.13%	8.89%	9.46%	2.30%	5.59%	8.42%	17.98%	7.46%	7.90%
Intl Small Cap Fund - Investor Class (Net)	5.81%	18.78%	21.42%	23.37%	21.82%	17.83%	8.64%	9.21%	2.22%	5.29%	8.11%	17.68%	7.22%	7.65%
MSCI ACWI ex USA Small Cap (Net)	4.90%	16.93%	17.68%	18.34%	13.46%	10.74%	6.54%	6.99%	0.64%	1.87%	0.99%	11.84%	5.32%	5.57%
MSCI ACWI ex US IMI (Net)	3.60%	12.71%	17.88%	17.83%	13.92%	10.20%	6.18%	6.29%	4.59%	5.50%	3.99%	11.02%	5.02%	5.23%

Performance greater than one year is annualized. **The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost and current performance may be lower than the performance quoted. For performance as of the most recent month-end, please call 1-866-947-7000.** Investment performance reflects fee waivers. In the absence of such fee waivers, total return would be reduced. Total annual fund operating expenses for the Institutional Class are 1.21% (gross) and are 1.10% (net) after investment adviser fee waiver. Total annual fund operating expenses for the Investor Class are 1.44% (gross) and are 1.35% (net) after investment adviser fee waiver. The waivers are contractual and in effect until 1/31/26. Investor Class shares charge up to a 0.25% annual shareholder service fee. Total returns assume reinvestment of dividends and capital gains distributions at net asset value when paid.

### TOP 10 ACTIVE HOLDINGS as of June 30, 2025

Company Name	Active Weight	Country	Industry Group
1. Celestica	2.1	Canada	Technology Hardware & Equipment
2. JOYY, Inc.	2.0	China	Media & Entertainment
3. easyJet Plc	2.0	United Kingdom	Transportation
4. JB Hi-Fi Ltd.	2.0	Australia	Consumer Discretionary Distribution & Retail
5. Hanwha Corp.	1.9	South Korea	Capital Goods
6. Jet2 Plc	1.8	United Kingdom	Transportation
7. Unipol Gruppo SpA	1.8	Italy	Insurance
8. Simplo Technology Co., Ltd.	1.8	Taiwan	Technology Hardware & Equipment

INTERNATIONAL SMALL CAP UNIVERSE - FACTOR PERFORMANCE for the quarter ended June 30, 2025

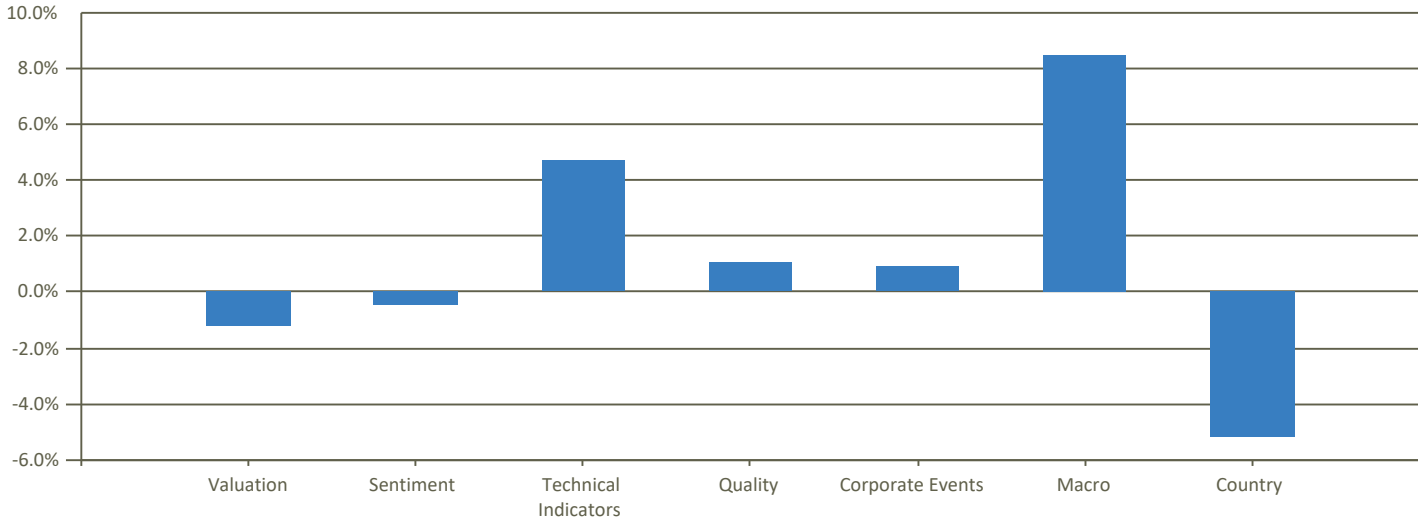

## Factors Driving Security Selection:

### Bottom-Up Factors (90%)

- Valuation
- Sentiment
- Technical Indicators
- Quality
- Corporate Events

### Top-Down Factors (10%)

- Macroeconomic
- Country

The Causeway International Small Cap strategy uses quantitative factors that can be grouped into the listed six categories. The relative return attributed to a factor is the difference between the equally-weighted average return of the highest ranked quintile of companies in the strategy's universe and that of the lowest ranked quintile of companies based on that factor. Holdings are subject to change.

**To determine if the Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expenses. This and other information can be found in the Fund's full or summary prospectus, which can be obtained by calling 1-866-947-7000 or visit us online at [www.causewayfunds.com](http://www.causewayfunds.com). Please read the prospectus, or the summary prospectus, carefully before you invest or send money.**

### **Risk Disclosure**

Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with equity investing, international investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. In addition to the normal risks associated with investing, investments in smaller companies typically exhibit higher volatility. Current and future holdings are subject to risk. There is no guarantee that securities mentioned will remain in or out of the Fund. Diversification may not protect against market risk. There is no assurance that a Fund will achieve its stated objectives.

Wtd Avg Mkt Cap is a weighted average of the total market capitalization of stocks in the portfolio or index. NTM Price/Earnings and Price-to-book ("P/B") value ratio is weighted harmonic average, and return on equity is weighted average. NTM= Next twelve months, LTM= Last twelve months. EPS = earnings per share. Price to earnings is a ratio for valuing a company that measures its current share price relative to its per-share earnings. P/B value evaluates a firm's market value relative to its book value. Return on Equity is calculated as a weighted average, winsorized using maximum Return on Equity figures at 3 standard deviations from the mean (winsorization is a statistical technique intended to remove the impact of outliers). Price momentum measures the velocity of price changes over a fixed time period. EPS (Earnings Per Share) Revision is an aggregate measure of changes in earnings forecasts.

Performance attribution charts show where the Fund's investments performed better or worse than the benchmark index during the month. Attribution is based on the return of the Fund's holdings gross of management fees and other expenses, and before any Fund fair valuation. Past performance does not guarantee future results. Attribution is calculated relative to the benchmark index (gross), which benchmark reflects reinvestment of distributions without any deductions for tax withholdings on such distributions.

The Causeway International Small Cap strategy uses quantitative factors that can be grouped into the following categories: valuation, earnings growth, technical indicators, quality, macroeconomics, and country. The return attributed to a factor is the difference between the equally weighted average return of the highest ranked quintile of companies in the strategy's small cap universe based on that factor and that of the lowest ranked quintile of companies.

The Fund's benchmark, the MSCI ACWI ex USA Small Cap Index, is a free float-adjusted market capitalization weighted index, designed to measure the equity market performance of developed and emerging markets excluding the U.S. market. The Index covers approximately 14% of the free float adjusted market capitalization in each country. The MSCI ACWI ex USA Small Cap Value Index captures small cap securities exhibiting overall value style characteristics. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield.

The MSCI ACWI ex USA Small Cap Index (Gross) is calculated to reflect reinvestment of distributions without any deductions for tax withholdings on such distributions. The MSCI ACWI ex USA Index (Net) is calculated to reflect reinvestment of distributions after accounting for tax withholdings on such distributions by applying a maximum assumed tax withholding rate. The Fund believes "net" benchmarks are regularly used by other registered investment companies and generally better align with the tax impact on the Fund's foreign security holdings. While the MSCI ACWI ex USA IMI Index (Net) is a broad-based index presented for regulatory reasons, the Fund believes the MSCI ACWI ex USA Small Cap Index (Net) is more representative of the securities in which the Fund will invest.

The MSCI ACWI ex USA Small Cap Growth Index captures small cap securities exhibiting overall growth style characteristics. The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term growth rate and long-term historical EPS.

Causeway Capital Management LLC serves as investment adviser for Causeway International Small Cap Fund. The Fund is distributed by SEI Investments Distribution Co. (SIDCO), which is not affiliated with the Fund or the investment adviser.

## International Small Cap Fund

Risk Lens is For Investment Professional Use Only.

Risk Lens is a free analytics tool that shows active style, sector, and geographic exposures for stock funds. It shows top risk exposures, top stock weights, and forecast risk measures, and it predicts fund return correlations.

<https://analytics.causewaycap.com/>.

Causeway Risk Lens is an investment analysis tool for illustration only. It is not intended to be relied on for investment advice. The risk comparisons are calculated by Causeway's model as of the reference date and are subject to change. Results may vary with each use and over time. There is no guarantee that any forecasts made will come to pass.

**Risk Model.** Causeway's risk model analyzes multiple factors for each fund holding (excluding certain portfolio ETFs, fixed income, and commodities and other derivatives) to calculate the fund's style exposures, forecast the fund's volatility, and forecast the fund's beta.

**Active Style Exposures.** The universe is all equity securities globally with average daily trading volume over the prior 90 days above \$500,000. Every security in the universe is scored on each of 8 style dimensions. These standardized scores range from +3 to -3, with a score of 0 being equal to the weighted average score across the universe, +3 being most representative of the style, and -3 being least representative of the style. Fund style exposures are the weighted average of the style scores of all fund holdings. Value, Long-term growth, leverage, liquidity, and size style scores are calculated relative to country. Momentum, volatility, and cyclical style scores are calculated on a global basis. Active style exposures measure the difference between the fund style exposures and the benchmark style exposures.

**Predicted Volatility.** Predicted fund level volatility (or annualized standard deviation of returns) is derived from holdings-based fund-level risk exposures, the historical covariance matrix of the risk factor returns, and idiosyncratic risk estimates.

**Predicted Beta.** Beta is a measurement of sensitivity to the benchmark index or ETF. Forecast beta is derived from holdings-based fund-level risk exposures, the historical covariance matrix of the risk factor returns, and idiosyncratic risk estimates.

**Predicted Tracking Error.** Predicted fund level tracking error measures dispersion from the benchmark index or ETF. It is derived from holdings-based fund-level and benchmark or ETF-level risk exposures, the historical covariance matrix of the risk factor returns, and idiosyncratic risk estimates.

**Top Risk Policies: Active.** Each active systemic risk is ranked from highest to lowest, and the five highest are reported. TCR represents total contribution to risk. TCAR represents total contribution to active risk. The % of Total equals TCAR divided by predicted tracking error.

**IMPORTANT:** The projections or other information generated by Causeway Risk Lens investment analysis tool regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results.
